*Human-computer Interaction* Peter Johnson, 1992 This text provides an overview of the fundamental aspects of cognitive psychology which introduce the reader to the theoretical and empirical findings about human memory learning knowledge representation and skill acquisition The coverage of these topics in the early chapters is related to HCI by providing examples and illustrations of user interface designs The book then considers the range of models that have been developed in HCI giving examples of where these models have been used and discussing the strengths and weaknesses of the various approaches

**The Computer in Experimental Psychology** Richard J. Bird, 1981

This book is about the use of computers in experimental psychology. Much of it deals with the application of real time computer systems to the carrying out of experiments in the laboratory and there are sections dealing with the concepts of computing underlying these application areas. Chapters are also devoted to the subjects of data analysis and to the management of small computer systems and networks. It is hoped therefore that with the exception of the subjects of artificial intelligence and the modeling of psychological processes which concern theoretical rather than experimental psychology the book presents a picture of the use of computers in experimental psychology as a whole.

This classic volume probes how a program reflects its writer's personality, the effects of working environment on productivity and many additional computer psychology issues. *The Computer Simulation of Behaviour* Michael J. Apter, 2018-05-15. This book originally published in 1970 concerns the new technique of computer simulation in psychology at the time. More general topics are discussed including the evaluation of such models, the relation of the field to cybernetics and the problem posed by consciousness. Today it can be read and enjoyed in its historical context. Computer Use in Psychology James V. Couch, 1987. *Computer Models of Mind* Margaret A. Boden, 1988-04-29. Designing Interaction John Millar Carroll, 1991-06-28. *Designing Interaction* first published in 1991 presents a broad-based and fundamental re-examination of human computer interaction as a practical and scientific endeavor. The chapters in this well-integrated, tightly focused book are by psychologists and computer scientists in industry and academia who examine the relationship between contemporary psychology and human computer interaction. HCI seeks to produce user interfaces that facilitate and enrich human motivation, action and experience but to do so deliberately it must also incorporate means of understanding user interfaces in human terms, the province of psychology. Conversely, the design and use of computing equipment provides psychologists with a diverse and challenging empirical field in which to assess their theories and methodologies.
