**Computer Numerical Control (cnc) Machines** P. Radhakrishnan, 1992 *Computer Numerical Control (CNC)* The Open The Open Courses Library, 2019-12-10 Computer Numerical Control CNC Manufacturing Processes CNC is the automation of machine tools that are operated by precisely programmed commands encoded and played by a computer as opposed to controlled manually via handwheels or levers In modern CNC systems end to end component design is highly automated using Computer Aided Design CAD and Computer Aided Manufacturing CAM programs The series of steps needed to produce any part is highly automated and produces a part that closely matches the original CAD design In the CNC machines the role of the operators is minimized The operator has to merely feed the program of instructions in the computer load the required tools in the machine and rest of the work is done by the computer automatically The computer directs the machine tool to perform various machining operations as per the program of instructions fed by the operator
