Both a study and a product of the information age, this work is of prime importance to teachers, teacher educators, and school administrators. This work is unique in three important ways: it presents data gathered in many regions of the world; many of the authors are well known and respected for their previous work in educational studies; and the chapters are designed in such a way that the majority of the book is easily accessible to professionals such as classroom teachers who are interested primarily in findings, results, and outcomes rather than the methodology of the research.
