Handbook of Cellular Manufacturing Systems Shahrukh A. Irani,1999-04-15 Cellular manufacturing CM is the grouping of similar products for manufacture in discrete multi machine cells It has been proven to yield faster production cycles lower in process inventory levels and enhanced product quality Pioneered on a large scale by Russian British and German manufacturers interest in CM methods has grown steadily over the past decade However there continues to be a dearth of practical guides for industrial engineers and production managers interested in implementing CM techniques in their plants Bringing together contributions by an international team of CM experts the Handbook of Cellular Manufacturing Systems bridges this gap in the engineering literature Summary University of California, Los Angeles.
