Computers in Action Donald D. Spencer, 1974 An introduction to computer technology terminology programming and different types of equipment

Computers in Action Sharon Elliott, 1984 Briefly describes the applications of computer technology in business industry information education and recreation

ENIAC in Action Thomas Haigh, Mark Priestley, Crispin Rope, 2016-06-24 The history of the first programmable electronic computer from its conception construction and use to its afterlife as a part of computing folklore Conceived in 1943 completed in 1945 and decommissioned in 1955 ENIAC the Electronic Numerical Integrator and Computer was the first general purpose programmable electronic computer But ENIAC was more than just a milestone on the road to the modern computer During its decade of operational life ENIAC calculated sines and cosines and tested for statistical outliers plotted the trajectories of bombs and shells and ran the first numerical weather simulations ENIAC in Action tells the whole story for the first time from ENIAC s design construction testing and use to its afterlife as part of computing folklore It highlights the complex relationship of ENIAC and its designers to the revolutionary approaches to computer architecture and coding first documented by John von Neumann in 1945 Within this broad sweep the authors emphasize the crucial but previously neglected years of 1947 to 1948 when ENIAC was reconfigured to run what the authors claim was the first modern computer program to be executed a simulation of atomic fission for Los Alamos researchers The authors view ENIAC from diverse perspectives as a machine of war as the first computer as a material artifact constantly remade by its users and as a subject of contradictory historical narratives They integrate the history of the machine and its applications describing the mathematicians scientists and engineers who proposed and designed ENIAC as well as the men and particularly the women who built programmed and operated it

Computers in Action Open University,1973 Data Processing Perry Edwards,Bruce Broadwell,1982 **Computers at Risk** National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Commission on Physical Sciences, Mathematics, and Applications,System Security Study Committee,1990-02-01 Computers at Risk presents a comprehensive agenda for developing nationwide policies and practices for computer security Specific recommendations are provided for industry and for government agencies engaged in computer security activities The volume also outlines problems and opportunities in computer security research recommends ways to improve the research infrastructure and suggests topics for investigators The book explores the diversity of the field the need to engineer countermeasures based on speculation of what experts think computer attackers may do next why the technology community has failed to respond to the need for enhanced security systems how innovators could be encouraged to bring more options to the marketplace and balancing the importance of security against the right of privacy

Introduction to Distributed Computer Systems Ludwik Czaja,2018-01-24 This book introduces readers to selected issues in distributed systems and primarily focuses on principles not on technical details Though the systems discussed are based on existing von Neumann computer architectures the book also touches on emerging processing paradigms Uniquely it approaches system components not only as static constructs but also in action exploring the different states they pass through The author s teaching experience shows that newcomers to the field students and even IT professionals can far more readily grasp the essence of distributed algorithmic structures in action than on the basis of static descriptions

Emergent Computer Literacy Helen Mele Robinson,2008-11-19 Robinson adds exceptional insight into how children become literate in a technological society and offers necessary tools for researchers and academics to understand how young children interact with computers both at home and in a school setting

Computing and Educational Studies Eugene F. Provenzo, Jr.,2014-05-01 This special issue calls for a greater awareness of computing as a critical area of study for those interested in educational studies Its purpose is to open up a wider dialogue about computing and education than has previously existed in the field The questions raised provide the basis for a lively discussion and analysis of the role of educational studies in interpreting the role of computing in our culture and educational system This issue also provides a model for exploring other topics of similar significance and importance to the field in future issues of the journal
