mathematical methods and computing techniques for pattern recognition computer vision image and signal analysis robot
vision and speech recognition as well as on a wide range of their applications This time the conference attracted participants
from 23 countries 9 in Iberoamerica and 14 from other parts of the world The total number of submitted papers was 187 and
after a serious review process 108 papers were accepted all of them with a scientific quality above overall mean rating Sixty
four were selected as oral presentations and 44 as posters Since 2008 the conference is almost single track and therefore
there was no real grading in quality between oral and poster papers As an acknowledgment that CIARP has established itself
as a high quality conference its proceedings appear in the Lecture Notes in Computer Science series Moreover its visibility is
further enhanced by a selection of a set of papers that will be published in a special issue of the journal Pattern Recognition
