Computers And Writing:

Computers and Writing Patrik O'Brian Holt, Noel Williams, 2012-12-06 Patrik O Brian Holt Heriot Watt University After speech writing is the most common form of human communication and represents the cornerstone of our ability to preserve and record information Writing by its very definition requires artifacts in the form of tools to write with and a medium to write on Through history these artifacts have ranged from sticks and clay tablets feather and leather crude pens and paper sophisticated pens and paper typewriters and paper and electronic devices with or without paper The development of writing tools has straightforward objectives to make writing easier and more effective and assist in distributing written communication fast and efficiently Both the crudest and most sophisticated forms of writing tools act as mediators of human written communication for the purpose of producing distributing and conserving written language In the modern world the computer is arguably the most sophisticated form of mediation the implications of which are not yet fully understood The use of computers a writing artifact which mediates communication for the production and editing of text is almost as old as computers themselves Early computers involved the use of crude text editors and a writer had to insert commands resembling a programming language to format and print a document For example to underline a word the writer had to do the following This is an example of how to ul underline a single word in order to produce This is an example of how to underline a single word

Computers and Writing Noel Williams, Patrik Holt, 1989 Includes papers which chart a flow of topics on computers and writing beginning with models of how people write and how software can be developed to facilitate the various aspects of that process and moving on to considerations in producing hypertext and computer generated story writing

Computers & Composing Jeanne W. Halpern, Sarah Liggett, 1984 Intended to 1 acquaint teachers with the potential of computers 2 show them what changes writers may have to make in their composing habits and 3 inform teachers of the changes they may have to make in course syllabi to prepare

students for the demands of the electronic world this book examines the impact of technology on composition instruction The first chapter discusses the capabilities and rapidly growing use in the business and professional world of such electronic technology as telecommunication systems and audio and electronic mail systems The second chapter distills information about dictation and word processing systems from an extensive review of research literature and from interviews with computer users and trainers at various business sites across the country Based on this the third chapter outlines the curricula required to enable students to be effective composers at the computer The fourth chapter contains forecasts of the kinds of research still needed for teachers to develop fruitful programs and strategies in the composition classroom Appendixes include materials from the interviews and information on audio mail systems and dictation processes HTH

Computers and the Teaching of Writing in American Higher Education, 1979-1994 Gail E. Hawisher, 1996 This book is a history composed of histories Its particular focus is the way in which computers entered and changed the field of composition studies a field that defines itself both as a research community and as a community of teachers This may have a somewhat sinister suggestion that technology alone has agency but this history made of histories is not principally about computers It is about people the teachers and scholars who have adapted the computer to their personal and professional purposes From the authors perspectives change in technology drives changes in the ways we live and work and we agents to a degree in control of our own lives use technology to achieve our human purposes REVIEW This book reminds those of us now using computers to teach writing where we have been and it brings those who are just entering the field up to date More important it will inform administrators curriculum specialists and others responsible for implementing the future uses of technology in writing instruction **Computers and Composition** **Writing On-line** James L. How to Write Papers and Reports about Computer Technology Charles H. Sides,1984 This book shows anyone who works with computer technology from hardware and software engineers to technical writers how to write papers and report which do not fail Preface *Computers and Writing* Elizabeth A. Carter,1985 Computers and Writing Deborah H. Holdstein,1990-01-01 **The Application of Computers in Writing Classes** ,2003 The application of computers in writing classes is a relatively new paradigm in education The adoption of computers in writing classes is gaining ground in many universities especially in the United States There were numerous issues that were addressed when conducting

computer assisted courses However there were not many studies conducted to assess students' reactions perceptions attitude and development in such courses A qualitative quantitative study was designed at a large campus at a Midwestern University to highlight details about students' attitude and development by using multiple sources of data Both qualitative and quantitative data were collected during the academic year 2002 Data sources include surveys and questionnaires e mail messages between the students and the instructor students' visits and responses to the Blackboard based course web page and students' portfolios that include all the students' acts of writing over a time span of an academic quarter Qualitative data were analyzed using grounded theory principles Content analysis was applied to find out the type of electronic and hard copy response interaction between the students and the instructor and the students themselves This study employed grounded theory that could reside within the constructivist belief system As for quantitative data a Repeated Measure Multivariate Analysis with ANOVA was applied to find out the statistical differences between the groups of this study that uses the same population Eleven students who were enrolled in a Preparatory Composition course at the University College in a Midwestern University participate in this study The study focused on the student's experience with this computer assisted course as taught via Blackboard To attain a deeper understanding of the students' learning experience in this course the study looked at how students respond to the instructions delivered by the instructor through the Blackboard platform the computer assisted learning environment created by the instructor the learning materials or feedbacks provided online or offline the nature of interactions sources of motivation and the students' cognitive development throughout the course The findings indicated that computer assisted learning helps students become independent learners They also indicated that students' individual differences and learning styles affected the students' performance in the course Some of the findings aligned with other research studies These include a readiness of resources b students' transition to the web based learning c course and time flexibility was a very positive aspect Copyright 2003 Yusuf Shudooh All Rights Reserved
