Computer Aided Systems Theory - EUROCAST'99 Franz Pichler,Roberto Moreno-Diaz,Peter Kopacek,2007-03-02 Computer Aided Systems Theory CAST deals with the task of

contributing to the creation and implementation of tools for the support of usual CAD tools for design and simulation by formal mathematical or logical means in modeling Naturally the basis for the construction and implementation of CAST software is provided by the existing current knowledge in modeling and by the experience of practitioners in engineering design Systems Theory as seen from the viewpoint of CAST research and CAST tool development has the role of providing formal frameworks and related theoretical knowledge for model construction and model analysis We purposely do not distinguish sharply between systems theory and CAST and other similar fields of research and tool development such as for example in applied numerical analysis or other computational sciences The here documented EUROCAST conference which took place at the Vienna University of Technology reflects current mainstreams in CAST As in the previous conferences new topics both theoretical and application oriented have been addressed The presented papers show that the field is widespread and that new developments in computer science and in information technology are the driving forces

The editors would like to thank the authors for providing their manuscripts in hard copy and in electronic form on time The staff of Springer Verlag Heidelberg gave as in previous CAST publications valuable support in editing this volume *Progress in Intelligent Computing Techniques: Theory, Practice, and Applications* Pankaj Kumar Sa, Manmath Narayan Sahoo, M. Murugappan, Yulei Wu, Banshidhar Majhi, 2017-08-03 The book focuses on both theory and applications in the broad areas of communication technology computer science and information security This two volume book contains the Proceedings of 4th International Conference on Advanced Computing Networking and Informatics This book brings together academic scientists professors research scholars and students to share and disseminate information on knowledge and scientific research works related to computing networking and informatics to discuss the practical challenges encountered and the solutions adopted The book also promotes translation of basic research into applied investigation and convert applied investigation into practice
