

Types of End User Computing

This slide represents the types of end user computing and includes traditional end user computing, end user control and end user development.

End User Development

- User is provided a collection of tools that allow users to design and develop apps that may be utilized for his or her own job, organization, department, or even as a product
- Useful because end users understand their own context and requirements better than anyone else, and they are typically aware of changes in their domains in real time
- Add Text Here

End User Control

- Departments purchase package programs and hardware for end user usage under end-user control
- End-user computing software that is not controlled and created in an environment with strong IT security standards
- Business units build and manage them, and they are integrated in business unit operations
- Add Text Here

Traditional EUC

- End user just employs computer systems and apps designed by programmers to aid the person's job
- Add Text Here

Computing Concepts For End Users

AW Chickering
