Computing Meaning Volume 2:

Computing Meaning H. Bunt, Reinhard Muskens, 1999-11-30 This book is a collection of papers written by outstanding researchers in the newly emerging field of computational semantics. It is aimed at those linguists, computer scientists, and logicians who want to know more about the algorithmic realization of meaning in natural language and about what is happening in this field of research. It includes a general introduction by the editors.

Computing Meaning Harry C. Bunt, Reinhard Muskens, 1999 **Computing Meaning** Harry C. Bunt, Reinhard Muskens, E. Thijsse, 1999 A contribution to the emerging discipline of computational semantics which is concerned with computing the meanings of linguistic objects such as sentences, text fragments, and dialogue. Here researchers offer 17 studies for linguists, computer scientists, and logicians interested in knowing more about the algorithmic realization of meaning in natural language. The topics include dynamic and underspecified interpretation without dynamic or underspecified logic, minimum description length, and compositionality, semantically based ellipsis resolution with syntactic presuppositions, dynamic discourse referents for tense and modals, and a disambiguation approach for German compounds with de verbal head. Applications in Ubiquitous Computing Raman Kumar, Sara Paiva, 2020-06-12 This book takes a deep dive into ubiquitous computing for applications in health, business, education, tourism, and transportation. The rich interdisciplinary contents of the book appeal to readers from diverse disciplines who aspire to create new and innovative research initiatives and applications in ubiquitous computing. Topics include condition monitoring and diagnostics, multi-objective optimization in design, multi-objective optimization of machining parameters, and more. The book benefits researchers, advanced students, as well as practitioners interested in applications of ubiquitous computing. Features practical, tested applications in ubiquitous computing. Includes applications such as health, business, education, electronics, tourism, and transportation. Applicable to researchers, academics, students, and professionals.

The German Perfect R. Musan, 2012-12-06 1 OUTLINE German has the three main perfect constructions which are illustrated in 1.1.1. In each of these constructions, the verb appears in the past participial form and is combined with an auxiliary. In this case, *haben* have, other verbs form their perfect constructions with the auxiliary *sein* be. 2 The auxiliary can then be combined with a tense. Let the present tense as in *Ua*, the past tense as in *b*, or the future tense as in *c*. 3.1.1 a PRESENT PERFECT *Die Eule hat die Schule verlassen* the owl has the school left. b PAST PERFECT *Die Eule hatte die Schule verlassen* the owl had the school left. c FUTURE PERFECT *Die Eule wird die Schule verlassen haben* the owl will the school left have. As will shortly become clear, the present perfect is the most intricate of the perfect constructions in German. It has been investigated intensely in the past with the result that today there is little doubt about what the core problems concerning its semantics are.

Ellipsis and Nonsentential Speech Reinaldo Elugardo, Robert J. Stainton, 2005-05-10 The papers in this volume address two main topics. Q1 What is the nature and especially the scope of ellipsis in natural language? Q2 What are the linguistic philosophical

implications of what one takes the nature scope of ellipsis to be As will emerge below each of these main topics includes a large sub part that deals speci cally with nonsentential speech Within the rst main topic Q1 there arises the sub issue of whether nonsentential speech falls within the scope of ellipsis or not within the second main topic Q2 there arises the sub issue of what linguistic philosophical implications follow if nonsentential speech does not count as ellipsis I THE NATURE AND SCOPE OF ELLIPSIS A General Issue How Many Natural Kinds There are many things to which the label ellipsis can be readily applied But it s quite unclear whether all of them belong in a single natural kind To explain consider a view assumed in Stainton 2000 Stainton 2004a and elsewhere It is the view that there are fundamentally at least three very different things that readily get called ellipsis each belonging to a distinct kind First there is the very broad phenomenon of a speaker omitting information which the hearer is expected to make use of in interpreting an utterance Included therein possibly as a special case is the use of an abbreviated form of speech when one could have used a more explicit expression See Neale 2000 and Sellars 1954 for more on this idea Topic and Focus Chungmin Lee,2007-01-16 This book contains a collection of papers exploring the cross linguistic expression of topic and focus A diverse set of perspectives from some of the leading scholars in the areas of semantics and intonation are represented in the collection which is based on papers presented at the Topic and Focus Workshop at the 2001 LSA Summer Institute in Santa Barbara This book is unique in the breadth of its typological coverage of topic and focus phenomena Material is presented from nine languages including several that are severely under documented from a theoretical perspective The expression of topic and focus are integral aspects of linguistic communication that introduce the content of discourse and emphasize its most crucial elements Topic and focus phenomena are complex and involve both a meaning and a prosodic component This book is the first collection of papers devoted to the rigorous examination of both semantic and intonational features of topic and focus from a broad typological perspective **Proceedings** ,2002 *Scientific and Technical Aerospace Reports* ,1984 Packed Computation of Exact Meaning Representations Iddo Lev,2007 **Popular Computing** ,1973 **Proceedings from Semantics and Linguistic Theory** ,2000 **ACL 2007** Association for Computational Linguistics.
