Autonomy And Ethnicity Negotiating Competing Claims In Multi Ethnic States:

Autonomy and Ethnicity Yash P. Ghai, 2000-10-12 This book first published in 2000 deals with one of the most urgent problems of contemporary times the political organisation of multi ethnic states Most major conflicts of our time are internal to the state and revolve around the claims of access to or the redesign of the state Responses to ethnic conflicts have ranged from oppression and ethnic cleansing to accommodations of ethnic claims through affirmative policies special forms of representation power sharing and the integration of minorities One of the most sought after and resisted devices for conflict management is autonomy Within an overarching framework that examines different understandings of ethnic consciousness and the variety of territorial autonomies the authors examine the experiences of spatial distribution of power in Canada India China South Africa Ethiopia PNG Spain the former Yugoslavia Cyprus Sri Lanka and Australia **Autonomy And Ethnicity** Gahi, International Conflict Resolution After the Cold War National Research Council, Commission on Behavioral and Social Sciences and Education, Committee on International Conflict Resolution, 2000-11-07 The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits Even the concept of international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict Do the old methods still work Are there new tools that could work better How do old and new methods relate to each other International Conflict Resolution After the Cold War critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners It considers recent applications of familiar conflict management strategies such as the use of threats of force economic sanctions and negotiation It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution including truth commissions engineered electoral systems autonomy arrangements and regional organizations It also opens up analysis of emerging issues such as the dilemmas facing humanitarian organizations in complex emergencies This book offers numerous practical insights and raises key questions for research on conflict resolution in a transforming world system Decentralization and Constitutionalism in Africa Charles M. Fombad, Nico Steytler, 2019-09-10 This collection of essays assesses the efforts of African governments to constitutionalise decentralisation be it in the form of federalism local government or traditional authorities Since the end of the Cold War jurisdictions across Africa have witnessed an ostensible return to multi party democracy within the paradigm of constitutionalism and the rule of law Linked to the democratisation process many countries took steps to decentralize power by departing from the heavily centralized systems inherited from colonial regimes The centralization of power typically characterized by the personalization and concentration of power in the hands of leaders and privileged elites in capital cities mostly resulted in repressive regimes and fragile states As decentralisation is a response to these challenges this volume

analyses the dynamic relationship between the efforts to implement decentralization and presence or absence of constitutionalism This volume examines a variety of forms and degrees of decentralization found across Africa It advances a new understanding of trends and patterns and facilitates the exchange of ideas among African governments and scholars about the critical role that decentralisation may play in democratization of and constitutionalism in Africa

Practising Self-Government Yash Ghai, Sophia Woodman, 2013-08-29 Autonomy provides a framework that allows for regions within countries to exercise self government beyond the extent available to other sub state units This book presents detailed case studies of thirteen such autonomies from around the world in which noted experts on each outline the constitutional legal and institutional frameworks as well as how these arrangements have worked in practice to protect minority rights and prevent secession of the territories in question The volume s editors draw on the case studies to provide a comparative analysis of how autonomy works and the political and institutional conditions under which it is likely to become a workable arrangement for management of the differences that brought it into being
