The Jewish Book of Days Jill Hammer, 2010-01-01 Throughout the ages Jews have connected legends to particular days of the Hebrew calendar Abraham's birth the death of Rachel and the creation of light are all tales that are linked to a specific day and season The Jewish Book of Days invites readers to experience the connection between sacred story and nature's rhythms through readings designed for each and every day of the year These daily readings offer an opportunity to live in tune with the wisdom of the past while learning new truths about the times we live in today Using the tree as its central metaphor The Jewish Book of Days is divided into eight chapters of approximately forty five days each These sections represent the tree's stages of growth seed root shoot sap bud leaf flower and fruit and also echo the natural cadences of each season Each entry has three components a biblical quote for the day a midrash on the biblical quote or a Jewish tradition related to that day and commentary relating the text to the cycles of the year The author includes an introduction that analyzes the different months and seasons of the Hebrew calendar and explains the textual sources used throughout Appendixes provide additional material for leap years equinoxes and solstices A section on seasonal meditations offers a new way to approach the divine every day [Camille Flammarion's The Planet Mars](#) Camille

Flammarion, 2014-10-30 Camille Flammarion 1842 1925 began his career at 16 as a human computer under the great mathematician U J J Le Verrier at the Paris Observatory He soon tired of the drudgery he was drawn to more romantic vistas and at 19 wrote a book on an idea that he was to make his own the habitability of other worlds There followed a career as France's greatest popularizer of astronomy with over 60 titles to his credit An admirer granted him a chateau at Juvisy sur l Orge and he set up a first rate observatory dedicated to the study of the planet Mars Finally in 1892 he published his masterpiece La Planete Mars et ses conditions d habitabilite a comprehensive summary of three centuries worth of literature on Mars much of it based on his own personal research into rare memoirs and archives As a history of that era it has never been surpassed and remains one of a handful of indispensable books on the red planet Sir Patrick Moore 1923 2012 needs no

introduction his record of popularizing astronomy in Britain in the 20th century equaled Flammarion's in France in the 19th century Moore pounded out hundreds of books as well as served as presenter of the BBC's TV program Sky at Night program for 55 years a world record Though Moore always insisted that the Moon was his chef d'oeuvre Mars came a close second and in 1980 he produced a typescript of Flammarion's classic Unfortunately even he found the project too daunting for his publishers and passed the torch of keeping the project alive to a friend the amateur astronomer and author William Sheehan in 1993 Widely regarded as a leading historian of the planet Mars Sheehan has not only meticulously compared and corrected Moore's manuscript against Flammarion's original so as to produce an authoritative text he has added an important introduction showing the book's significance in the history of Mars studies Here results a book that remains an invaluable resource and is also a literary tour de force in which the inimitable style of Flammarion has been rendered in the equally unique style of Moore

surfaced How often have we seen evidence pushed aside to accommodate what the scholars deem an established theory In what follows we will question some of the age old beliefs that still haunt the minds of the human family and offer alternative theories based on the available evidence
