Digital Wildlife Photography John Gerlach, Barbara Gerlach, 2012 From how many frames you need to shoot per second to capture that WOW moment to where to focus on a bird with a big beak to get the best depth of field this book has it all for the wildlife photographer It is an impressive mix of technology with just plain good advice for image taking and they discuss each point specifically for shooting wildlife because it is a totally unique type of photography The lighting and shutter speed for a macro flower shot is not the same that you'd need for a bird in flight or a kangaroo jumping across a field Mix together this fantastic info with the many years of experience that the Gerlachs have shooting and teaching and the absolutely jaw dropping images and you really do have a perfect storm for a book

Speedlights & Speedlites Lou Jones, 2012-11-12 Canon Speedlites and Nikon Speedlights are small off camera flashguns that can provide big results if you know how to use them properly Acclaimed Boston photographers Lou Jones Bob Keenan and Steve Ostrowski guide you through the technical and creative aspects of how to get the most out of these powerful tools in this indispensable guide packed full of inspirational images and comprehensive diagrams of the lighting set ups used to capture them They are significantly more advanced lighter and considerably cheaper than a standard flashgun and have many advantages They are small and cheap enough that a number can be carried in your kit and they can be used in combination triggered wirelessly They use through the lens TTL metering which allows you to use the in camera LCD and histograms to calculate the required power direction rather than having to use a light meter or trial and error They use proprietary dedicated technology from Canon and Nikon that means there are no compatibility issues Getting the most out of them however remains a mystery most photographers still just use their speedlights in the same way as a standard flash gun This is where this book comes in
