J. Seeds,1980      **Large Signal Impedances of Avalanche Diode Oscillators** Gary Stephen Ash,1973      Large-Signal Impedances of Avalanche Diode Oscillators ,1970 The large signal impedances of a silicon avalanche diode were measured in the 8 12 GHz region with the device operating in the active mode A commercial diode was used to generate more than 20 mW CW at efficiencies up to 1 5 percent in a specially constructed coaxial cavity Precise circuit measurements permitted the resolution of diode negative resistance and reactance values and indicated values of negative resistance as high as 2100 ohms at the resonant frequency The measured values are compared with those predicted by a cascade type model of avalanching regions The relation between the theoretical small signal impedance and the calculated large signal impedance is indicated as well as the application of these data to the design of avalanche diode oscillators Author      **A Gallium Arsenide Schottky Barrier Avalanche Diode Oscillator** John Joseph Berenz,1970      *Characterization of an Avalanche Diode Oscillator* Dean Freeman Peterson,1969      **Avalanche Transit-time Devices** George I.
