Health Care Policy Reform in America: Innovations from the States Howard M. Leichter, 2019-10-25 This work tracks the role of the states in US health care policy reform It reviews the challenges faced by the states in dealing with rising costs and looks at their policy competence and role in managed care whilst focusing on the outcomes of policy reform in states such as Hawaii and Oregon

The Transformation of American Health Insurance Troyen A. Brennan, 2024-07-30 Can American health insurance survive In *The Transformation of American Health Insurance* Troyen A Brennan traces the historical evolution of public and private health insurance in the United States from the first Blue Cross plans in the late 1930s to reforms under the Biden administration In analyzing this evolution he finds long term trends that form the basis for his central argument that employer sponsored insurance is becoming unsustainably expensive and Medicare for All will emerge as the sole source of health insurance over the next two decades After thirty years of leadership in health care and academia Brennan argues that Medicare for All could act as a single payer program or become a government regulated program of competing health plans like today s Medicare Advantage The choice between these two options will depend on how private insurers adapt and behave in today s changing health policy environment This critical evolution in the system of financing health care is important to employers health insurance executives government officials and health care providers who are grappling with difficult strategic choices It is equally important to all Americans as they face an inscrutable health insurance system and wonder what the future might hold for them regarding affordable coverage
