e-Business in Construction Chimay J. Anumba, Kirti Ruikar, 2009-01-21 With a number of disparate often geographically distributed organisations involved in the delivery of construction projects there has been considerable interest in e business tools within the construction industry These tools open up a range of possibilities for the industry to rethink existing processes and working methods so their use is increasingly common Nevertheless there has been little definitive guidance for practitioners researchers and students on the major issues in electronic business from a construction perspective By bringing together 16 contributions from research and industry covering theory technological issues practical implementation and legal matters and illustrated with a number of case studies e Business in Construction fills that gap Starting with the theoretical aspects of e commerce and moving on to consider the specifics of the construction context it includes a mechanism for the assessment of the e readiness of construction sector organisations The middle part of the book focuses on the role of various technologies in e business with examples included as appropriate This is followed by a discussion of practical legal and trust issues The potential of next generation of information and communication technologies is also addressed With a fine blend of theoretical and practical aspects of e commerce in construction and well illustrated with a number of industrial case studies e Business in Construction will find an appreciative audience of construction practitioners researchers and students at all levels

Agents and Multi-Agent Systems in Construction Chimay Anumba, Zhaomin Ren, O.O. Ugwu, 2007-04-11 This book describes current advances and future directions in the theory and application of intelligent agents and multi agent systems in the Architecture Engineering and Construction AEC sector It is the product of an international effort involving a network of construction IT and computing researchers investigating different aspects of agent theory and applications The contributed chapters cover different perspectives and application areas and represent significant efforts to harness emerging technologies such as intelligent agents and multi agent systems for improved business processes in the AEC sector The first four chapters cover the theoretical foundations of agent technology whilst the remaining chapters deal with the application of agent based systems in solving problems in the construction domain
