A Lethal Involvement:

A Lethal Involvement Clive Egleton, 1995 The Ethics of Medical Involvement in Capital Punishment Joseph B.R. Gaie, 2004-02-29 The morality of capital punishment has been debated for a long time This however has 1 not resulted in the settlement of the question either way Philosophers are still divided In this work I am not addressing the morality of capital punishment per se My question is different but related It is this Whether or not capital punishment is morally right is it moral or immoral for medical doctors to be involved in the practice To deal with this question I start off in Chapter One delineating the sort of involvement the medical associations consider to be morally problematic for medical doctors in capital punishment They make a distinction between what they call 2 medicalisation of and involvement in capital punishment and argue that there is a moral distinction between the two Whilst it is morally acceptable for doctors to be involved in capital punishment according to the medical associations it is immoral to medicalise the practice I clarify this position and show what moral issues arise I then suggest that there should not be a distinction between the two The medical associations argue that the medicalisation of capital punishment especially the use by medical doctors of lethal injection to execute condemned prisoners is immoral and therefore should be prohibited because it involves doctors in doing what is against the aims of medicine

Ethics in Pharmacy Practice: A Practical Guide Dennis M. Sullivan, Douglas C. Anderson, Justin W. Cole, 2021-06-16 This textbook offers a unique and accessible approach to ethical decision making for practicing pharmacists and student pharmacists Unlike other texts it gives clear guidance based on the fundamental principles of moral philosophy explaining them in simple language and illustrating them with abundant clinical examples and case studies The strength of this text is in its emphasis on normative ethics and critical thinking and that there is truly a best answer in the vast majority of cases no matter how complex The authors place high trust in a pharmacist's moral judgment This teaches the reader how to think based on ethical principles not necessarily what to think This means navigating between the two extremes of overly theoretical and excessively prescriptive The cogent framework given in this text uses the language of competing duties identifying the moral principles at stake that create duties for the pharmacist This is the balancing act of normative ethics and of deciding which duties should prevail in a given clinical situation This work presents a clear cut pathway for resolving ethical dilemmas encountered by pharmacists based on foundational principles and critical thinking Presents a clear cut pathway for resolving the ethical dilemmas encountered by pharmacists based on foundational principles and critical thinking Jon E Sprague RPh PhD Director of Science and Research for the Ohio Attorney General Neurointerventions, Crime, and Punishment Jesper Ryberg, 2019-11-05 Advances in new neuroscientific research tools and technologies have not only led to new insight into the processes of the human brain they have also refined and provided genuinely new ways of modifying and manipulating the human brain The aspiration of such interventions is to affect conative cognitive and affective brain processes associated with emotional regulation empathy and moral judgment Can the use of neuroscientific

technologies for influencing the human functioning brain as a means of preventing offenders from engaging in future criminal conduct be justified In Neurointerventions Crime and Punishment Jesper Ryberg considers various ethical challenges surrounding this question More precisely he provides a framework for considering neuroethical issues within the criminal justice system and examines a set of procedures which the criminal justice system relies on to deal with criminal offending To do this Ryberg addresses the following questions among others Is it morally acceptable to offer more lenient sentences to offenders in return for participation in neuroscientific treatment programs Or would such offers be unacceptably coercive Is it possible to administer neurointerventions as a type of punishment Would it be acceptable for physicians to participate in the administration of neurointerventions on offenders What is the moral significance of the sordid history of brain interventions for the present or future use of such treatment options As rehabilitation comes back into fashion after many decades and as neuroscientific knowledge and technology advance rapidly these intricate and controversial topics become increasingly more urgent Ryberg argues that many of the in principle objections to neuroscientific treatment are premature but given the way criminal justice systems currently function such treatment methods should not be put into practice

Disarming Intervention Seantel Anaïs,2015-08-15 Non lethal weapons take many forms from rubber bullets to electroshock and long range acoustic devices which their proponents argue are ethical legal and humane Social scientists historians legal scholars and activists have long challenged the use of non lethal weapons in policing and war Until now little scholarly attention has been paid to the social historical and legal relations that animate the concept of non lethality nor is there a comprehensive account of how the concept has achieved social and political acceptance Disarming Intervention tells the story of how the concept of non lethality emerged in a series of nineteenth century legal codes that governed the conduct of international hostilities and how it continued to legitimate US led armed conflicts as ethical legal and humane throughout the twentieth century Seantel Anaïs unpacks these issues by tracing the social historical and legal legitimization of non lethality in the United States and in armed interventions abroad Disarming Intervention shows in detail how it came to be that an idea forever changed the relationship between contemporary weapons of armed conflict and war's constitutive objective to produce irreversible injury and death
