MODE

most common

MEAN

$\frac{\text{sum of values}}{\text{number of values}}$

MEDIAN

middle value

## Example

9 3 3 5 2  
6 6 4 6 2

The **range** is not an average, but tells you how the data is spread out:

RANGE

largest value – smallest value

Mode = the most common number is 6

$$\text{Mean} = \frac{9+3+3+5+2+6+6+4+6+2}{10} = \frac{46}{10} = 4.6$$

Median = 2, 2, 3, 3, 4, 5, 6, 6, 6, 9

Median = 4.5

$$\text{Range} = 9 - 2 = 7$$

**Averages** Jane Jonas Srivastava,1975 A simple explanation of averages how they work and how they are used      **The Importance of Average** Stephen Farenga,2010-03-16 The Importance of Average calls attention to the policies and practices that discriminate against the silent majority of students in the American educational system Arguments presented emphasize the collateral damage caused to average students by legislative mandates administrative policies teaching practices parenting beliefs and adherence to strict psychological constructs Each of these factors has created a pervasive psycho educational belief of average ability The authors challenge what they consider as a pseudo definition of average that was brought about as an attempt by policymakers to test their way out of addressing the true inequities found in society Further the authors identify how educational policymakers have sacrificed the education of an entire class of students by creating the illusion that underachievement can be eliminated simply through lowering standards and examination pass rates In chronicling the plight of average students the authors capture the emotions and attitudes of teachers parents and students whose frustrations have been set aside in order to meet other special interests The authors explore methods that provide students of average knowledge in any given area with the appropriate tools necessary for succeeding in school Finally the authors argue that there is no such thing as average intelligence      **Journal of the Textile Institute** Textile Institute (Manchester, England),1921 List of members in v 1 8      **Engineering** ,1900      **The American Mathematical Monthly** ,1918 Includes section Recent publications      **Trends in the well-being of America's children and youth** United States.
