## **Awaiting Apocalypse:**

**Awaiting Apocalypse** P. Corcoran, 1999-12-03 The current obsession with the end of the millennium illustrates the enduring power of the idea of endings This fascination cannot be simply dismissed as faulty logic a form of madness or a primitive survival of childish thinking Opening a path of understanding between ancient conceptions of meaning and the sceptical predicates of modern science *Awaiting Apocalypse* shows how ordinary and extraordinary endings are inherent in the narrative structure of human experience and the sedimentation of that experience as historical meaning

*Cosmological Readings of Contemporary Australian Literature* Kathrin Bartha-Mitchell, 2023-12-22 This book presents an innovative and imaginative reading of contemporary Australian literature in the context of unprecedented ecological crisis The Australian continent has seen significant rapid changes to its cultures and land use from the impact of British colonial rule yet there is a rich history of Indigenous land ethics and cosmological thought By using the age old idea of cosmos the order of the world to foreground ideas of a good order and chaos reciprocity and more than human agency this book interrogates the Anthropocene in Australia focusing on notions of colonisation farming mining bioethics technology environmental justice and sovereignty It offers cosmological readings of a diverse range of authors Indigenous and non Indigenous as a challenge to the Anthropocene s decline narrative As a result it reactivates cosmos as an ethical vision and a transculturally important counter concept to the Anthropocene Kathrin Bartha Mitchell argues that the arts can help us envision radical cosmologies of being in and with the planet and to address the very real social and environmental problems of our era This book will be of particular interest to scholars and students of Ecocriticism Environmental Humanities and postcolonial transcultural and Indigenous studies with a primary focus on Australian New Zealand Oceanic and Pacific area studies

*Ecosystem Crises Interactions* Merrill Singer, 2021-03-03 Explores the human impacts on environment that lead to serious ecological crises an innovative resource for students professionals and researchers alike *Ecosystem Crises Interaction Human Health and the Changing Environment* provides a timely and innovative framework for understanding how negative human activity impacts the environment and how seemingly disparate factors connect to and magnify hazardous consequences under a changing climate Presenting a coherent holistic perspective to the subject this compelling textbook and reference examines the diverse often unexpected links that connect our complex world in context of global climate change The text illustrates how eco crisis interaction the synergistic interface of two or more environmental events or pollutants can multiply to produce harmful health effects that are greater than their additive impact This concept is highlighted through numerous real and relatable examples from the use of sediment rock in hydraulic and drinking water filtration systems to the connections between human development and crises such as deforestation emergent infectious diseases and global food insecurity Throughout the text specific examples present opportunities to consider broader questions about the extinction of species populations and ways of life Presenting a balanced investigation of the interaction of

contemporary ecological dangers human behavior and health this unique resource Explores how complex interactions between global warming and anthropogenic impairments magnify the diverse ecological perils and threats facing humans and other species Discusses roadblocks to addressing environmental risk such as global elite polluters the organized denial of climate change and deliberate environmental disruption for financial gain Describes how the production and use of fossil fuels are driving a significant rise in carbon dioxide and other pollutants in the atmosphere and in the oceans Illustrates how industrial production is contributing to an array of environmental crises including fuel spills waste leakages and loss of biodiversity Examines the critical ecosystems that are at risk from interacting stressors of human origin Ecosystem Crises Interaction Human Health and the Changing Environment is an ideal textbook for advanced undergraduate and graduate students in courses including public and allied health environmental studies medical ecology medical anthropology and geo health and a valuable reference for researchers practitioners and policy makers in fields such as environmental health global and planetary health public health climate change and medical social science *Cold War Cultures* Annette Vowinckel, Marcus M. Payk, Thomas Lindenberger, 2012-03-01 The Cold War was not only about the imperial ambitions of the super powers their military strategies and antagonistic ideologies It was also about conflicting worldviews and their correlates in the daily life of the societies involved The term Cold War Culture is often used in a broad sense to describe media influences social practices and symbolic representations as they shape and are shaped by international relations Yet it remains in question whether or to what extent the Cold War Culture model can be applied to European societies both in the East and the West While every European country had to adapt to the constraints imposed by the Cold War individual development was affected by specific conditions as detailed in these chapters This volume offers an important contribution to the international debate on this issue of the Cold War impact on everyday life by providing a better understanding of its history and legacy in Eastern and Western Europe **Awaiting the Millennium** Richard G. Kyle, 1998 The Last Days Are Here Again serves as a comprehensive source regarding movements related to the end times This handy guide also examines ideas espoused by fringe groups such as the Heaven s Gate cult and shows how end time thinking has been adapted to fit nearly every time period Unlocking the Poetry of W. B. Yeats Daniel Tompsett, 2018-06-13 Unlocking the Poetry of W B Yeats undertakes a thorough re reading of Yeats oeuvre as an extended meditation on the image and theme of the heart as it is evident within the poetry It places the heart at the centre of a complex web of Yeatsian preoccupations and associations from the biographical to the poetic and philosophical to the mythological and mystical In particular the book seeks to unlock Yeats mystifying aesthetic vision via his understanding of the ancient Egyptian Weighing of the Heart ceremony The work provides a chronological narrative arc that looks to use the theme of the heart as it recurs in the poetry in order to circumvent and overcome more established frameworks Its purpose is to offer refreshing ways of conceptualizing and building alternatives to more deeply entrenched but not entirely satisfactory arguments that have been offered since Yeats
