The Mystery of Space Robert T. Browne, 1919 Mathematics is the biometer of intellectual evolution Hence the determination of the status quo of the intellect at any time can be accomplished most satisfactorily by applying to it the rigorous measure of the mathematical method The intellect has but one true divining rod and that is mathematics By day and by night it points the way unerringly so long as it

leads through materiality but falteringly blindly fatally when that way veers into the territory of vitality and spirituality Wherefore when we have wished to ascertain the real status of the intellect as well as its limitations tendencies possibilities we have turned to its conduct in the field of mathesis where it is least trammled in its ingressive and egressive motivations because of the natural and easy accommodation which is offered for intellectual movement Whether there are signs of moribundity or symptomatic evidences of marked growth or of a termination of intellectual regnancy or whatever may be the occasion for the examination no surer index than the mathematical may be found for the purpose Full logical justification is therefore claimed for the choice of mathematical evidences to test the assumption that a new era of conscious mental conquest is opening for the vanguard of humanity and sequently for the human family **Improvement Era** ,1902 Town Journal ,1925 The Legacy of Rome Cyril Bailey,1923 This book is an endeavour to trace in many fields the extent of the inheritance which the modern world owes to Ancient Rome The chapters have been written independently and it will be seen that they are not all on the same plan Some writers have described the contribution of Rome to civilization and have left it to the reader to infer the extent of the legacy others have traced the steps by which the legacy has come to us and to this subject Professor Foligno has devoted a valuable chapter Editor s note *Encyclopædia of Religion and Ethics: Sacrifice-Sudra* James Hastings,John Alexander Selbie,Louis Herbert Gray,1920 Scope theology philosophy ethics of various religions and ethical systems and relevant portions of anthropology mythology folklore biology psychology economics and sociology Science ,1930
