Anticipatory Learning Classifier Systems:

Anticipatory Learning Classifier Systems Martin V. Butz, 2002-01-31 Anticipatory Learning Classifier Systems describes the state of the art of anticipatory learning classifier systems adaptive rule learning systems that autonomously build anticipatory environmental models An anticipatory model specifies all possible action effects in an environment with respect to given situations It can be used to simulate anticipatory adaptive behavior Anticipatory Learning Classifier Systems highlights how anticipations influence cognitive systems and illustrates the use of anticipations for 1 faster reactivity 2 adaptive behavior beyond reinforcement learning 3 attentional mechanisms 4 simulation of other agents and 5 the implementation of a motivational module The book focuses on a particular evolutionary model learning mechanism a combination of a directed specializing mechanism and a genetic generalizing mechanism Experiments show that anticipatory adaptive behavior can be simulated by exploiting the evolving anticipatory model for even faster model learning planning applications and adaptive behavior beyond reinforcement learning Anticipatory Learning Classifier Systems gives a detailed algorithmic description as well as a program documentation of a C implementation of the system

Advances in Learning Classifier Systems Pier L. Lanzi, Wolfgang Stolzmann, Stewart W. Wilson, 2003-07-31 Learning classifier systems are rule based systems that exploit evolutionary computation and reinforcement learning to solve difficult problems They were introduced in 1978 by John H Holland the father of genetic algorithms and since then they have been applied to domains as diverse as autonomous robotics trading agents and data mining At the Second International Workshop on Learning Classifier Systems IWLCS 99 held July 13 1999 in Orlando Florida active researchers reported on the then current state of learning classifier system research and highlighted some of the most promising research directions The most interesting contributions to the meeting are included in the book Learning Classifier Systems From Foundations to Applications published as LNAI 1813 by Springer Verlag The following year the Third International Workshop on Learning Classifier Systems IWLCS 2000 held September 15 16 in Paris gave participants the opportunity to discuss further advances in learning classifier systems We have included in this volume revised and extended versions of thirteen of the papers presented at the workshop

Advances in Learning Classifier Systems Pier L. Lanzi, Wolfgang Stolzmann, Stewart W. Wilson, 2003-08-01 This book constitutes the thoroughly refereed post proceedings of the 4th International Workshop on Learning Classifier Systems IWLCS 2001 held in San Francisco CA USA in July 2001 The 12 revised full papers presented together with a special paper on a formal description of ACS have gone through two rounds of reviewing and improvement The first part of the book is devoted to theoretical issues of learning classifier systems including the influence of exploration strategy self adaptive classifier systems and the use of classifier systems for social simulation The second part is devoted to applications in various fields such as data mining stock trading and power distribution networks

constitutes the refereed proceedings of the 5th International Workshop on Learning Classifier Systems IWLCS 2003 held in Granada Spain in September 2003 in conjunction with PPSN VII The 10 revised full papers presented together with a comprehensive bibliography on learning classifier systems were carefully reviewed and selected during two rounds of refereeing and improvement All relevant issues in the area are addressed

Learning Classifier Systems Pier Luca Lanzi, Wolfgang Stolzmann, Stewart W. Wilson, 2003-11-24 The 5th International Workshop on Learning Classifier Systems IWLCS2002 was held September 7-8 2002 in Granada Spain during the 7th International Conference on Parallel Problem Solving from Nature PPSN VII We have included in this volume revised and extended versions of the papers presented at the workshop In the first paper Browne introduces a new model of learning classifier system iLCS and tests it on the Wisconsin Breast Cancer classification problem Dixon et al present an algorithm for reducing the solutions evolved by the classifier system XCS so as to produce a small set of readily understandable rules Ene and Barbaroux take a close look at Pittsburgh style classifier systems focusing on the multi agent problem known as El farol Holmes and Bilker investigate the effect that various types of missing data have on the classification performance of learning classifier systems The two papers by Kovacs deal with an important theoretical issue in learning classifier systems the use of accuracy based fitness as opposed to the more traditional strength based fitness In the first paper Kovacs introduces a strength based version of XCS called SB XCS The original XCS and the new SB XCS are compared in the second paper where Kovacs discusses the different classes of solutions that XCS and SB XCS tend to evolve

Anticipatory Behavior in Adaptive Learning Systems Martin V. Butz, Olivier Sigaud, Pierre Gérard, 2003-07-09 The interdisciplinary topic of anticipation attracting attention from computer scientists psychologists philosophers neuroscientists and biologists is a rather new and often misunderstood matter of research This book attempts to establish anticipation as a research topic and encourage further research and development work First the book presents philosophical thoughts and concepts to stimulate

the reader's concern about the topic Fundamental cognitive psychology experiments then confirm the existence of anticipatory behavior in animals and humans and outline a first framework of anticipatory learning and behavior Next several distinctions and frameworks of anticipatory processes are discussed including first implementations of these concepts Finally several anticipatory systems and studies on anticipatory behavior are presented
