The Basics of Antitrust Policy Roger Alan Boner, Reinald Krueger, 1991 *Antitrust and the Triumph of Economics* Marc Allen Eisner, 1989 *Market Dominance and Antitrust Policy* Michael A. Utton, 2005-01-01 Market dominance encompassing single firm dominance overt and tacit collusion mergers and vertical restraints raises many complex analytical and policy issues all of which continue to be the subject of theoretical research and policy reform This second edition of a popular and comprehensive text extends the arguments and combines an analysis of the issues with a discussion of actual policy and case studies This new edition addresses the recent fundamental changes in antitrust law especially in the UK and the EU and reviews some high profile and controversial cases such as the Boeing McDonnell Douglas merger and the Microsoft monopoly The author moves on to deal with several unresolved questions including the conflicts between trade and antitrust policy the foreign take over of domestic assets and extra territorial claims made by certain countries Task Force Report on Antitrust Policy. Released by the Department of Justice, May 21, 1969 White House Task Force on Antitrust Policy, 1969 **The Modernisation of EC Antitrust Law** Rein Wesseling, 2000-07 In recent years European Community EC competition law has come under fire Continued criticism of all aspects of the means by which EC competition law is enforced has brought to light ineffectiveness of the present system Consequently the European Commission has responded by issuing the White Paper on Modernisation which sets out its vision on the future of EC competition law This new book takes a step back and tries to understand the current challenges to EC competition policy by examining the origins of the Community's competition law system In the first part of the book the author sketches the development of Community competition law enforcement between the European Economic Community established in 1958 and the European Union of today Taking this dynamic perspective on EC competition law the second part of the book addresses topical problems of EC competition policy the pertinent objectives the institutional framework the division of jurisdiction between the Community and Member States and decentralised enforcement of Community law Notably the author's conclusions diverge considerably from the analysis found in the Commission White Paper on Modernisation The author proposes various alternative solutions to the existing problems which arguably fit better within the overall constitutional development of the Community than the solutions offered by the Commission The book will be of interest to competition lawyers as well as to all those interested in the constitutional development of the European Community **Antitrust Law in Perspective** Andrew I. Gavil, William E. Kovacic, Jonathan B. Baker, 2008 Gavil Kovacic and Baker's Antitrust Law in Perspective Cases Concepts and Problems in Competition Policy builds on the strengths of the first edition with completely updated cases notes and sidebars reflecting the latest developments and commentary It includes Expanded economic coverage A thoroughly revised chapter on dominant firm conduct A thoroughly revised chapter on distribution restraints that comprehensively addresses the Supreme Court's Leegin

decision Revised and expanded treatment of the analysis of competitor collaborations and joint ventures Revised state of the art conspiracy and merger chapters Increased attention to international and comparative developments Some older cases have been reduced to notes in favor of newer cases that better reflect current trends
