Deceivers Deceived:

The Epistemology of Deceit in a Postdigital Era Alison MacKenzie, Jennifer Rose, Ibrar Bhatt, 2021-08-03 This edited book collection offers strong theoretical and philosophical insight into how digital platforms and their constituent algorithms interact with belief systems to achieve deception and how related vices such as lies bullshit misinformation disinformation and ignorance contribute to deception This inter disciplinary collection explores how we can better understand and respond to these problematic practices The Epistemology of Deceit in a Postdigital Era Dupery by Design will be of interest to anyone concerned with deception in a postdigital era including fake news and propaganda online The election of populist governments across the world has raised concerns that fake news in online platforms is undermining the legitimacy of the press the democratic process and the authority of sources such as science the social sciences and qualified experts The global reach of Google YouTube Twitter Facebook and other platforms has shown that they can be used to create and spread fake and misleading news quickly and without control These platforms operate and thrive in an increasingly balkanised media eco system where networks of users will predominantly access and consume information that conforms to their existing worldviews Conflicting positions even if relevant and authoritative are suppressed or overlooked in everyday digital information consumption Digital platforms have contributed to the prolific spread of false information enabled ignorance in online news consumers and fostered confusion over determining fact from fiction The collection explores Deception what it is and how its proliferation is achieved in online platforms Truth and the appearance of truth and the role digital technologies play in pretending to represent truth How we can counter these vices to protect ourselves and our institutions from their potentially baneful effects Chapter 15 is available open access under a Creative Commons Attribution 4 0 International License via link springer.com

A Genius for Deception Nicholas Rankin, 2009-11-10 In February 1942 intelligence officer Victor Jones erected 150 tents behind British lines in North Africa Hiding tanks in Bedouin tents was an old British trick writes Nicholas Rankin German general Erwin Rommel not only knew of the ploy but had copied it himself Jones knew that Rommel knew In fact he counted on it for these tents were empty With the deception that he was carrying out a deception Jones made a weak point look like a trap In A Genius for Deception Nicholas Rankin offers a lively and comprehensive history of how Britain bluffed tricked and spied its way to victory in two world wars As Rankin shows a coherent program of strategic deception emerged in World War I resting on the pillars of camouflage propaganda secret intelligence and special forces All forms of deception found an avid sponsor in Winston Churchill who carried his enthusiasm for deceiving the enemy into World War II Rankin vividly recounts such little known episodes as the invention of camouflage by two French artist soldiers the creation of dummy airfields for the Germans to bomb during the Blitz and the fabrication of an army that would supposedly invade Greece Strategic deception would be key to a number of WWII battles culminating in the massive misdirection that proved critical to the success of the D Day invasion in 1944 Deeply researched and written with an eye for

telling detail A Genius for Deception shows how the British used craft and cunning to help win the most devastating wars in human history

Cross-cultural Deception in Polish and American English in Computer-Mediated Communication Anna Kuzio, 2018-09-30

Deception is omnipresent throughout the evolution of life inseparable from the development of various modes of communication By effectively manipulating the behavior of others apparently by taking advantage of recipients own rules communicators are able to gain an advantage while negotiating meaning in a cross cultural environment Even though much research related to deceptive behavior and its detection has been conducted in recent years little of it has concentrated on deception outside of a North American context This monograph addresses that lacuna Consistently most research on deception has examined face to face verbal communication and ignored computer mediated communication In response this book also provides detailed insights into how computer mediated communication and adopted cultural values affect deceptive communication and deception detection across cultures namely in Poland and the USA It focuses on discussing theories about why cues to deception exist theories specific to verbal cues to deception and theories about computer mediation in communication The book also proposes a research model postulating relationships between computer mediated communication media cue detection media familiarity national culture espoused cultural values veracity judgment success and deceptive communicative behavior

Self-deception and Morality Mike W. Martin, 1986

This book systematically explores the moral issues surrounding self deception While many articles and books have been written on the concept of self deception in recent years Martin s gives much greater emphasis to self deception as a significant topic for both ethical theory and applied ethics Self deception is perplexing from a moral point of view It seems tailor made to camouflage and foster immorality Does all self deception involve some guilt and is it among the most abhorrent evils as some moralists and theologians have charged Or is it only wrong sometimes such as when it has bad consequences Could it on occasion be permissible or even desirable to deceive ourselves just as we are sometimes justified in deceiving other people Are self deceivers perhaps more like innocent victims than perpetrators of deceit and as such deserving of compassion and help Or paradoxically are they best viewed with ambivalence culpable as deceivers and simultaneously innocent as victims of deception from the introduction Martin develops a conception of self deception as the purposeful evasion of acknowledging to oneself truths or one s view of truth He details a systematic framework for understanding the main moral perspectives and traditions concerning self deception that have emerged in western philosophy In so doing he clarifies related concepts like sincerity authenticity honesty hypocrisy weakness of will and self understanding Ranging across traditions both philosophical Kant Kierkegaard and Sartre and non philosophical Freud Eugene O Neill and Henrik Ibsen Martin shows why self deception is as morally complex as any

other major form of behavior The appeal of this book is broad The volume will challenge professional philosophers and psychologists yet it is organized and written to be accessible to students in courses on ethics philosophy of mind and philosophy of literature Martin s numerous literary examples should also interest literary critics Cyclopaedia of Biblical, Theological and Ecclesiastical Literature John McClintock,1891 **Sermon Plans** George Edward Howe,1911 **The biblical illustrator: or, Anecdotes [&c.] on the verses of the Bible, by J.S.
