Absolutism In Central Europe:

Absolutism in Central Europe Peter Wilson, 2002-11 Absolutism in Central Europe is about the form of European monarchy known as absolutism how it was defined by contemporaries how it emerged and developed and how it has been interpreted by historians political and social scientists This book investigates how scholars from a variety of disciplines have defined and explained political development across what was formerly known as the age of absolutism It assesses whether the term still has utility as a tool of analysis and it explores the wider ramifications of the process of state formation from the experience of central Europe from the early seventeenth century to the start of the nineteenth

King Chǒngjo, an Enlightened Despot in Early Modern Korea Christopher Lovins, 2019-03-25 Were the countries of Europe the only ones that were early modern Was Asia's early modernity cut short by colonialism Scholars examining early modern Eurasia have not yet fully explored the relationships between absolute rule and political modernization in the highly contested early modern world Using a comparative perspective that places Chǒngjo king of Korea from 1776 to 1800 in context with other Korean kings and with contemporary Chinese and European rulers Christopher Lovins examines the shifting balance of power in Korea in favor of the crown at the expense of the aristocracy during the early modern period This book is the first to analyze in English the recently discovered collection of 297 private letters written by Chǒngjo himself These letters were a vital channel of communication outside of official court historians scrutiny since private meetings between the king and his ministers were forbidden by custom Royal politics played out in an arena of subtle communication with court officials trying to read the king's unstated elliptically hinted at intentions and the king trying to suggest what he wanted done while maintaining plausible deniability Through close analysis of both official records and private letters including Chǒngjo's secret letters Lovins shows that in contrast to previous assumptions the late eighteenth century Korean monarchs were not weak and ineffective but instead were in the process of building an absolutist polity

From 'Civil Society' to 'Europe' Grazyna Skapska, 2011-05-23 In East Central Europe constitutionalism comprises an effort by postcommunist societies to consolidate around certain values

principles and rules that would facilitate the formation of a new political architecture as well as a new political identity for their countries Based primarily on the experience of Poland in comparison with other East Central European countries this book debates the specific features of postcommunist constitutionalism The result is a theory of reflexive constitutionalism informed by the sociological theory of reflexive modernization which assesses critically the intellectual resources as well as the consolidating potential of the classic foundations of liberal democracy within the reality of postcommunist transformation
