Abstract Concepts Of Drawing:

Abstract Concepts of Drawing, 1983 *Placemaking Through Myths, Experience, and Drawing* Phillip James Tabb, 2026-04-21 This book reveals the profound connections between placemaking mythology and experience as focused on creating vital and meaningful places through the process of drawing By delving into these concepts Tabb explores how we can unlock powerful tools for designers architects planners and communities Exploring ancient stories embarking on journeys to historic places and cultivating the art of drawing six different drawing techniques are covered including in situ sketching studio enhanced drawing mythic landscapes diagrams watercolors and conceptual masterplans These drawing techniques relate to dwelling by showcasing a range of experiences including becoming more present capturing immediate impressions and envisioning future developments By analyzing these drawings planners and designers can learn from the featured places architectural examples and best design practices gaining practical insights into the complex interplay of factors that contribute to successful placemaking This book is based upon research and drawings completed by the author over the past 25 years This book is essential for practitioners planners designers artists and students interested in concepts of place myths experience and drawing **Proceedings of the Workshop on Cognitive Social Sciences** Ron Sun,

Formal Concept Analysis Agnès Braud, Aleksey Buzmakov, Tom Hanika, Florence Le Ber, 2021-06-22 This book constitutes the proceedings of the 16th International Conference on Formal Concept Analysis ICFCA 2021 held in Strasbourg France in June July 2021 The 14 full papers and 5 short papers presented in this volume were carefully reviewed and selected from 32 submissions The book also contains four invited contributions in full paper length The research part of this volume is divided in five different sections First Theory contains compiled works that discuss advances on theoretical aspects of FCA Second the section Rules consists of contributions devoted to implications and association rules The third section Methods and Applications is composed of results that are concerned with new algorithms and their applications Exploration and Visualization introduces different approaches to data exploration *The Science of Lay Theories* Claire M. Zedelius, Barbara C. N. Müller, Jonathan W. Schooler, 2017-07-14 This timely and important collection broadens our understanding of the ways in which lay theories also known as folk psychologies implicit theories naïve theories or mindsets impact our lives and social relations Moving well beyond lay theories as applied to intelligence and achievement this volume considers lay theories in an admirably wide context including perspectives on prejudice creativity self regulation health free will justice magic religion and more Eminent and emerging scholars alike provide a comprehensive overview that presents and synthesizes cutting edge contemporary research on lay theories spanning social cognitive developmental cultural and clinical psychology Structurally this volume is organized in three parts Beginning with a preface by renowned scholar Carol Dweck the first part looks at the origins and nature of lay theories and how malleable they are The second part explores lay theories about common psychological phenomena The third section discusses lay theories about the metaphysical or supernatural Finally the last

section explores the important question of how lay theories impact health and health behavior Taken together the chapters provide an integrative survey of the science of lay theories bringing together many perspectives that previously have been studied largely in isolation This volume is more than the sum of its parts perspectives from different strands of research provide insights that cut across research disciplines making novel connections and prompting new directions for this field of study Shedding light on how our beliefs shape all facets of our lives The Science of Lay Theories How Beliefs Shape Our Cognition Behavior and Health will appeal to researchers and practitioners in psychology as well as philosophers cognitive and developmental neuroscientists religious scholars sociologists and anthropologists It is very rare to say of an edited volume of scholarly chapters I couldn't put it down Yet that was the case with this book It's not just that I have worked in this field for many years but rather with every chapter I felt I was gaining new insights into what deep down people really believe and how these beliefs influence their lives Carol Dweck Stanford University Palo Alto CA USA

Grounding Cognition Diane Pecher,Rolf A. Zwaan,2005-01-10 One of the key questions in cognitive psychology is how people represent knowledge about concepts such as football or love Some researchers have proposed that concepts are represented in human memory by the sensorimotor systems that underlie interaction with the outside world These theories represent developments in cognitive science to view cognition no longer in terms of abstract information processing but in terms of perception and action In other words cognition is grounded in embodied experiences Studies show that sensory perception and motor actions support understanding of words and object concepts Moreover even understanding of abstract and emotion concepts can be shown to rely on more concrete embodied experiences Finally language itself can be shown to be grounded in sensorimotor processes This book brings together theoretical arguments and empirical evidence from several key researchers in this field to support this framework
