Cultures in Contrast Myra Shulman, 2009 Cultures in Contrast is designed for students who are entering college or university life in the 21st century It provides challenging readings and comprehension questions in every unit accompanied by updated suggested films and additional readings In each unit students move from a general exploration of their beliefs to an analysis of a case study a discussion of readings and finally a specific choice of a coping strategy for a hypothetical dilemma The case studies and readings while providing various perspectives on life in the United States are also meant to strengthen students cultural self awareness The second edition features a new unit on binge drinking which has been added to recognize one of the most serious problems on college campuses today Today more than ever students on college campuses are expected to have a sensitivity to and respect for diversity as well as a heightened awareness of

individual rights and responsibilities This text attempts to prepare students for this academic environment Cultures in Contrast offers these students a means for analyzing and evaluating the complex social and moral issues that young adults throughout the world have to deal with

Second Language Acquisition and Lifelong Learning Simone E. Pfenninger, Julia Festman, David Singleton, 2023-05-05 Language fundamentally defines and distinguishes us as humans as members of society and as individuals As we go through life our relationship with language and with learning shifts and changes but it remains significant This book is an up to date resource for graduate students and researchers in second language L2 acquisition who are interested in language learning across the lifespan The main goal is to survey and evaluate what is known about the linguistic cognition affect associations that occur in L2 learning from birth through senescence passing through the stages of childhood adolescence adulthood and third age the extent to which L2 acquisition may be seen as contributing to healthy and active aging the impact of the development of personalized technology enhanced communicative L2 environments and how these phenomena are to be approached scientifically and methodologically The effects of certain specific variables such as gender socio economic background and bilingualism are also analyzed as we argue that chronological age does not determine the positioning of L2 learners across the lifespan age is part of a complex web of social distinctions such as psychological and individual factors that intersect in the construction of a learner s relative status and opportunities
