

Chapter 3 ACCTG 215

Operation Decisions and the Accounting System

- The long-term objective for any business is to turn cash into more cash

Elements of the Income Statement

- Income statement will show you the operating side of things
- **Revenues:** Increase in assets or settlements of liabilities from the major or central ongoing operations of the business
 - Increase net income and SE
 - Increase with Credits
 - Accounts have credit balances
 - EX: selling chocolate, tours of factory
- **Expenses:** Decreases in assets or increases in liabilities from ongoing operations incurred to generate revenues during the period
 - Decrease net income and SE
 - Increase with Debits
 - Accounts have debit balances
 - Not all cash expenditures (outflows) are expenses, but expenses are necessary to generate revenue
 - EX: Selling chocolate (inventory) and "overhead"
- Gross Margin (or Gross Profit) = Revenues – Cost of Goods Sold

Financial Statement Connections

- $A = L + SE$
- SE (Contributed Capital + RE)
 - Contributed Capital APIC
 - Ending RE = Beginning RE + NI (Revenues – Expenses) – Dividends
- A transaction that impacts the income statement always impacts the equity section of the balance sheet too
