Disclaimer

These notes are not intended for stand-alone study – they are a summary of what is useful to me and are not ENTIRELY comprehensive (but pretty close to it). They are mostly theory-based. Look at the course-book and text-book, tutorial and assignment answers for how to do most of the calculations. Please do not ask for calculation notes, I do not intend to make them. That being said, I hope they are incredibly helpful.

Chapter 1 – “Theory and concepts”

What is accounting?

- The purpose of accounting is to **identify and record** (residual analysis) and **communicate** (generally through statements) the economic events of an organisation to interested users.

Who uses accounting data?

- **Internal users:** Within the organisation – management, employees, various departments
- **External users:** Taxation authorities, customers, investors, creditors, suppliers
- Different entities have different needs for the information and access to information

Laws regarding accounting

- NZ Financial Reporting Act of 1993
 - Set to be replaced by the Financial Reporting Bill by 2015.
- Who is involved in the rule-setting process?
 - International Accounting Standards Board (IASB) – 15 members
 - NZ External Reporting Board (XRB) – 9 members
 - NZ Accounting Standards Board (NZASB) – 10 members (committee of XRB)
- The XRB is responsible for setting auditing and accounting standards.
- Standard setting process
 - IASB: Research topic / discussion paper; due process (public comment); exposure draft; due process; issued if 9 of 15 members approve
 - NZASB: Received IASB standard; submitted to XRB for approval
 - NZASB has the power to come up with new NZ-specific FRS to supplement IFRS, but not often

Generally accepted accounting practice (GAAP)

- GAAP includes IFRS, IASB interpretations of IFRS, NZ-specific FRS
- Currently, private “for-profit” entities must follow GAAP.
- In the FRB, only “publicly accountable” or “large” entities must follow GAAP.
 - Publicly accountable = majority of debt or equity instruments are traded on exchanges (shares or debentures traded publicly)
 - Large = At least \$30m revenue and \$60m assets or 10 shareholders
- If there is no standard:
 - Analogy (similar principles from another standard)
 - Conceptual Framework (see below)
- By following GAAP, it is presumed you have a true and fair view
 - If not, must follow standard and have footnotes explaining why it is not true and fair
- Two tiers of GAAP in NZ
