## Abstract

Reading is an essential skill that plays vital role in learning a language. Similar to other skills that are Listening, Writing and speaking the understanding of reading is influenced by myriad factors. Here an attempt is made to identify the problems that are countered by students while attempting reading comprehension so that proper technique can be identified to cope with this issue of solving a reading comprehension. Questions that have been answered in this paper are (1) Problems faced by students while doing reading comprehension? (2) Why these difficulties are faced? (3) What techniques can be used in class so that students do not face any issue while taking reading comprehension? Explanatory multi method is used to study the difficulties wherein a test was given to students and later on their result was analyzed and identified where students faced more difficulty whether it was in vocabulary, poor reading habits or less interesting reading comprehension. Moreover, it also focused on how reading comprehension techniques can be taught to students.

**Keywords:** Vocabulary, Reading Ability, Reading comprehension

## Introduction

For all the learners Reading comprehension is considered to be one of essential Skills. Different types of passages are given that cover diverse range of topics from sports to science, business to law. All the topics are of general interest. They deal with issues which are interesting and appropriate for test takers. Sometimes non verbal material like diagrams, graphs or illustration are also present in reading comprehension. Understanding in advance what students need to do in every type of task gives student huge advantage. This way during the test student will only read the instructions to confirm what they already know. Moreover, sometimes even lecturers are unaware about the problems that students encounter and to overcome the fear of reading comprehension it is important that lecturers also try to understand the problem so that they can provide ideas or tricks to overcome those issues.

## What is Reading Comprehension

According to Snow and Sweet (2003), "reading comprehension is a multi-dimensional and complex process that requires high cognitive ability of extraction and construction, in that the reader extracts the meanings from the text, while at the same time combining them with existing knowledge in order to construct new meanings."

Pearson and Johnson have supported the idea saying, "Reading comprehension seems to involve language, motivation, perception, concept, development, the whole of experience itself. It seems to be subject to the same constraints as thinking, reasoning and problem solving. The only distinction, one might want to make, is in the source of input for the cognitive processing. Whatever influences general thinking or problem solving ability also influences reading comprehension. However, there are a few factors that comprehension but do not influence thinking or problem solving."
