Regional Approaches to Water Pollution in the Environment P.E. Rijtma, V. Eliás, 2012-12-06 Regional Approaches to Water Pollution in the Environment integrates knowledge and experience on pollution problems related to industrial agricultural and municipal activities and former military sites with special emphasis on the Black Triangle the region situated at the borders between North Bohemia Polish Lower Silesia and South Saxony Here some five million inhabitants live in an area of brown coal basins having the highest emissions of sulphuric and nitrogen emission in the whole of Europe The large scale damage in this region

is due to obsolete technology and insufficient equipment for monitoring emissions Health effects are severe and controlling the pollution can only be done at high cost There is thus a need to exchange knowledge and experience on methods for evaluating the expected effects of measures and purification techniques to remedy ground and surface water pollution
