J. Goodrich, 2015-06-15 Excerpt from *Complete Musical Analysis A System Designed to Cultivate the Art of Analyzing and Criticising and Assist in the Performance and Understanding of the Works of the Great Composers of the Different Epochs* Among the vast army of music students busily engaged in acquiring technical skill in manipulating instruments and voices there are comparatively few who cultivate the critical faculties in listening properly to music or have sufficient analytical knowledge to enable them to name and classify a composition after a single hearing Some interesting books have been written in which certain music is recommended to be performed for pupils but listening to music is an art and can be acquired only through a systematic series of exercises and instructions unless one is content to wait for the gradual absorption of this information through a professional career of many years Acknowledgment is also made of the fact that even in small cities one may have the privilege of listening to the greatest artists including such birds of passage as von Bülow Rubinstein and Albert Klindworth Rosenthal Essipoff and Aus der Ohe But in truth considerable of this heavy cannonading is so to say fired over the heads of the average student Every embryo pianist is improved by hearing a recital by any of these artists but in the majority of cases they should descend somewhat from their lofty pedestal to the common earth upon which the student stands if others than advanced students are to be hit by their artistic missiles But it is often impossible for these distinguished virtuosi who in addition to their inherent gifts have enjoyed every possible advantage to comprehend the chaotic state of musical culture outside the radius of our large cities The text books the laws of the country which permit the titles of Professor and Doctor to be bestowed upon persons who are ignorant of the very nomenclature of music and that spirit of American impatience which seeks to acquire everything by a patent process these are responsible for the present uncultivated state of musical taste About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www](http://www.forgottenbooks.com)

Complete Musical Analysis, Etc A. J. GOODRICH, 1889 **The Piece as a Whole** Hugh Aitken, 1997-10-30 Designed to serve music students at the college level, this informal approach to music theory relates the technical aspects of music with the expressive character of the art. The approach is holistic in the sense that it focuses on the interrelationships between the piece as heard by a socially conditioned listener and the notated performed score. It aims to bridge the gap between the technical and expressive aspects of music. The composers addressed are Bach, Mozart, Beethoven, Chopin, Schumann, Brahms, Wagner, Debussy, and Schoenberg. There are separate chapters on the problems of meaning in music and on the interdependence of aesthetic and ethical value judgments. This novel and exciting approach to music theory will be a welcome addition to the musical analysis literature.
