Directionalist Theory of Space* H. Scott Hestevold,2020-07-02 In *Toward a Directionalist Theory of Space* On Going Nowhere
H Scott Hestevold formulates a new relationalist theory of space by appealing to the view that the universe is directioned in
the sense that there exist directional relations a class of spatial relations that Leibniz overlooked Extending the directionalist
relationalist theory of space to the problem of when it is that discrete objects compose a whole Hestevold revisits his answer
to the Special Composition Question He also uses the directionalist relationalist theory to formulate reductivist theories of
boundaries and holes theories that may allow one to resist the view that boundaries and holes are ontologically parasitic
entities Finally he explores directionalism relationalism vis vis spacetime After noting findings of modern physics that favor
substantivalist spacetime and then developing metaphysical concerns that favor instead directionalist relationalist spacetime
Hestevold notes the ontological benefit of endorsing spatiotemporal directional relations even if spacetime substantivalism is
