*The Bioarchaeology of Ritual and Religion* Alexandra Livarda, Richard Madgwick, Santiago Riera Mora, 2017-12-21 The Bioarchaeology of Ritual and Religion is the first volume dedicated to exploring ritual and religious practice in past societies from a variety of environmental remains Building on

recent debates surrounding for instance performance materiality and the false dichotomy between ritualistic and secular behavior this book investigates notions of ritual and religion through the lens of perishable material culture Research centering on bioarchaeological evidence and drawing on methods from archaeological science has traditionally focused on functional questions surrounding environment and economy However recent years have seen an increased recognition of the under exploited potential for scientific data to provide detailed information relating to ritual and religious practice This volume explores the diverse roles of plant animal and other organic remains in ritual and religion as foods offerings sensory or healing mediums grave goods and worked artifacts It also provides insights into how archaeological science can shed light on the reconstruction of ritual processes and the framing of rituals The 14 papers showcase current and new approaches in the investigation of bioarchaeological evidence for elucidating complex social issues and worldviews The case studies are intentionally broad encompassing a range of sub disciplines of bioarchaeology including archaeobotany anthracology palynology micromorphology geoarchaeology zooarchaeology including avian and worked bone studies archaeomalacology and organic residue analysis The temporal and geographical coverage is equally wide extending across Europe from the Mediterranean and Aegean to the Baltic and North Atlantic regions and from the Mesolithic to the medieval period The volume also includes a discursive paper by Prof Brian Hayden who suggests a different interpretative framework of archaeological contexts and rituals

*The Archaeology of Ritual* Evangelos Kyriakidis, 2007-12-31 A wide spectrum of scholars historians art historians anthropologists students of performance students of religion archaeologists cognitive scientists and linguists were all asked to think and comment on how ritual can be traced in archaeology and which ways ritual research can go in that discipline The product is a fairly accurate representation of research on ritual and the archaeology of ritual scholars from various disciplines backgrounds and agendas arguing mostly in the most logical fashion yet with little agreement between them So this book should not be seen as presenting one unified attitude towards ritual and its study in archaeology It should rather be seen as a reflection of what the discourse in the archaeology of ritual is today The outcome has been extremely thought provoking often controversial but always of extremely high quality

**Beyond Belief** Yorke M. Rowan, 2012-05-22 This volume details recent archaeological explorations of ancient religion and sacred ritual The chapters bring multiple perspectives and differing methodological approaches to case studies representing widely divergent regions and time periods to illustrate some of the most recent methodological and theoretical approaches to the archaeological study of ancient religion and ritual

**Ritual, Play and Belief, in Evolution and Early Human Societies** Colin Renfrew, Iain Morley, Michael Boyd, 2017-12-21 The origins of religion and ritual in humans have been the focus of centuries of thought in archaeology anthropology theology evolutionary psychology and more Play and ritual have many aspects in common and ritual is a key component of the early cult practices that underlie the religious systems of the first complex societies in all parts of the world This book examines the formative cults and the roots of religious practice from the

earliest times until the development of early religion in the Near East in China in Peru in Mesoamerica and beyond Here leading prehistorians and other specialists bring a fresh approach to the early practices that underlie the faiths and religions of the world They demonstrate the profound role of play ritual and belief systems and offer powerful new insights into the emergence of early civilization

**Defining the Sacred** Nicola Laneri, 2015-05-08 Religion is a phenomenon that is inseparable from human society It brings about a set of emotional ideological and practical elements that are pervasive in the social fabric of any society and characterizable by a number of features These include the establishment of intermediaries in the relationship between humans and the divine the construction of ceremonial places for worshipping the gods and practicing ritual performances and the creation ritual paraphernalia Investigating the religious dimensions of ancient societies encounters problems in defining such elements especially with regard to societies that lack textual evidences and has tended to lead towards the identification of differentiation between the mental dimension related to religious beliefs and the material one associated with religious practices resulting in a separation between scholars able to investigate and possibly reconstruct ritual practices i e archaeologists and those interested in defining the realm of ancient beliefs i e philologists and religious historians The aim of this collection of papers is to attempt to bridge these two dimensions by breaking down existing boundaries in order to form a more comprehensive vision of religion among ancient Near Eastern societies This approach requires that a higher consideration be given to those elements either artificial buildings objects texts etc or natural landscapes animals trees etc that are created through a materialization of religious beliefs and practices enacted by members of communities These issues are addressed in a series of specific case studies covering a broad chronological framework that from the Pre pottery Neolithic to the Iron Age Cover illustration German Archaeological Institute photo N Becker

Ritual Failure Vasiliki G. Koutrafouris, Jeff Sanders, 2013-12-31 Ritual Failure is a new concept in archaeology adopted from the discipline of anthropology Resilient religious systems disappearing strict believers and faithful practitioners not performing their rites entire societies changing their customs how does a religious ritual system transform change or disappear leaving only traces of its past glory Do societies change and then their ritual Or do customs change first in turn provoking wider cultural shifts in society Archaeology possesses the tools and methodologies to explore these questions over the long term from the emergence of a system to its peak and then its decay and disappearance and in relation to wider social and chronological

developments The collected papers in this book introduce the concept of ritual failure to archaeology The analysis explores ways in which ritual may have been instrumental in sustaining cultural continuity during demanding social conditions or how its functionality might have failed resulting in discontinuity change or collapse The collected papers draw attention to those turbulent social times of change for which ritual practices are a sensitive indicator within the archaeological record The book reviews archaeological evidence and theoretical approaches and suggests models which could explain socio cultural change through ritual failure The concept of ritual failure is also often used to better understand other themes such as identity and wider social economic and political transformations shedding light on the social conditions that forced or introduced change This book will engage those interested in ritual theory and practices but will also appeal to those interested in exploring new avenues to understanding cultural change From transformations in the use of ritual objects to the risks inherent in practicing ritual from ritual continuity in customs to sudden and profound change from the Neolithic Near East to Roman Europe and Iron Age Africa this book explores what happens when ritual fails
