Archaic Greek Art (620-480 B.C.) Jean Charbonneaux,Roland Martin,François Villard,1971 *Archaic Greek Art Against Its Historical Background* Gisela Marie Augusta Richter,1949 **Making Sense of Greek Art** Vicky Coltman,2012 This volume of ten essays by classicists art historians and archaeologists seeks to engage with the intellectual challenge that is making sense of Greek art Each essay and the collection as a whole strives to ask what is at stake historically in the designation Greek art through the close study of a variety of objects including sculptures paintings mirrors and mosaics in their ancient Greek context and through their later adoptions and reworkings from the Hellenistic and Roman periods The ten essays trace a thread of classical artistry across the centuries and are published here in memory of John Betts who taught in the Department of Classics at the University of Bristol for thirty seven years and founded Bristol Classical Press in 1977 Chronologically the essays cover the so called Archaic period in Greece from 750 500 BCE up to the Crystal Palace at Sydenham in mid nineteenth century Britain With this vast historical panorama the volume offers a series of discrete historical case studies with a surprising overlap in the recurring themes of originality and reproduction cultural identities and desire **Greek Art and Aesthetics in the Fourth Century B.C.** William A. P. Childs,2018-04-10 *Greek Art and Aesthetics in the Fourth Century B C* analyzes the broad character of art produced during this period providing in depth analysis of and commentary on many of its most notable examples of sculpture and painting Taking into consideration developments in style and subject matter and elucidating political religious and intellectual context William A P Childs argues that Greek art in this era was a natural outgrowth of the high classical period and focused on developing the rudiments of individual expression that became the hallmark of the classical in the fifth century As Childs shows in many respects the art of this period corresponds with the philosophical inquiry by Plato and his contemporaries into the nature of art and speaks to the contemporaneous sense of insecurity and renewed religious devotion Delving into formal and iconographic developments in sculpture and painting Childs examines how the sensitive expressive quality of these works seamlessly links the classical and Hellenistic periods with no appreciable rupture in the continuous exploration of the human condition Another overarching theme concerns the nature of style as a concept of expression an issue that becomes more important given the increasingly multiple styles and functions of fourth century Greek art Childs also shows how the color and form of works suggested the unseen and revealed the profound character of individuals and the physical world **The Art of the Greeks** Henry Beauchamp Walters,1922
