Architects On Architecture:

Architects on Architecture Paul Heyer,1993 Based on interviews with leading architects this book presents their thoughts on architectural theory and practice

Think Like an Architect Hal Box,2010-01-01 An award winning architect and educator demystifies the process of making architecture and explains why good architectural design matters The design of cities and buildings affects the quality of our lives Making the built environments in which we live work and play useful safe comfortable efficient and as beautiful as possible is a universal quest What many don t realize is that professional architects design only about five percent of the built environment While much of what non architects build is beautiful and useful the ugliness and inconveniences that blight many urban areas demonstrate that an understanding of good architectural design is vital for creating livable buildings and public spaces To help promote this understanding among non architects and those considering architecture as a profession award winning architect and professor Hal Box explains the process from concept to completed building using real life examples to illustrate the principles involved To cause what we build to become architecture we have three choices hire an architect become an architect or learn to think like an architect In this book organized as a series of letters to students and friends Box covers what architecture should be and do how to look at and appreciate good buildings how to understand the design process work with an architect or become an architect an overview of architectural history with lists of books to read and buildings to see practical guidance about what goes into constructing a building an architect s typical training and career path how architecture relates to the city where the art of architecture is headed why good architecture matters

Key Modern Architects Andrew Higgott,2018-05-31 Key Modern Architects provides an accessible and thought provoking introduction to the work of the most significant architects of the modern era Fifty short chapters introduce fifty key architects from Le Corbusier to Aldo Van Eyck to Zaha Hadid exploring their most influential buildings and developing a critique of each architect s work within a broader cultural and historical context The selection represents the most influential architects working from 1890 to the present those most likely to be taught on survey courses in modern architectural history along with some lesser known names with an equal claim to influence Emphasis is placed on a critical and interpretative approach allowing the student to position each architect in a cultural and intellectual context quickly and easily Artistic technical social and intellectual developments are brought to the fore built and unbuilt projects writings and influences This approach brings to light the ideology behind architectural work offering insights into each architect s working practice Helps students to develop a critical approach to understanding modern architectural history One chapter per architect meaning chapters may be read individually as a concise resource for the study of an architect or together as a coherent book length history of the whole period of modern architecture Chapters are supported by boxed lists of each architect s most significant projects along with

suggestions for further reading as a springboard to further study and research Combining the clarity and accessibility of a textbook with in depth reading and a critical approach Key Modern Architects provides an invaluable resource for both the classroom and for independent study in architectural and art history **Images of Architectural Practice & Education** American Institute of Architects,1992 **The Oral History of Modern Architecture** John Peter,1994 In the closing chapter the architects speculate about the future of modern architecture Biographies a time chart a bibliography and a visitor s guide to more than 150 of the sites pictured and discussed complete the volume *American Architects and the Mechanics of Fame* Roxanne Kuter Williamson,2011-03-01 Why does one talented individual win lasting recognition in a particular field while another equally talented person does not While there are many possible reasons one obvious answer is that something more than talent is requisite to produce fame The something more in the field of architecture asserts Roxanne Williamson is the association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated In this study of more than six hundred American architects who have achieved a place in architectural histories Williamson finds that only a small minority do not fit the right person right time pattern She traces the apprenticeship connection in case studies of Louis Sullivan Frank Lloyd Wright Henry Hobson Richardson the firm of McKim Mead White Latrobe and his descendants the Bulfinch and Renwick Lines the European immigrant masters and Louis Kahn Although she acknowledges and discusses the importance of family connections the right schools self promotion scholarships design competition awards and promotion by important journals Williamson maintains that the apprenticeship connection is the single most important predictor of architectural fame She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self confidence to be true to one s own vision Perhaps she says this is the case in all the arts *American Architects and the Mechanics of Fame* is sure to provoke thought and comment in architecture and other creative fields [The Executive Architect](#) John E. Harrigan,Paul R. Neel,1996-03-27 We cannot continue to accept the view that when times are good we will prosper and when times are bad we will suffer We must move from a business of commissioned services to one of direct participation in all our clients endeavors where productive participation establishes us as trusted partners the currency for a continuing relationship John E Harrigan and Paul R Neel In their drive to compete effectively in the emerging world economic order today s enterprise organizations are undergoing a period of radical redesign restructuring and redefinition As they do so they are coming to rely more and more upon design professionals to help them build their roads to the future This means that unlimited opportunities now await the architect who can look beyond the everyday aspects of professional practice and learn as much as possible about his or her clients worlds But forging enduring partnerships with clients requires more than just proven design skills on the part of an architect Today s successful architect is as much a business executive as an artist He or she is conversant in an array of core business skills including marketing client relations

leadership strategic management and others rarely covered in professional education programs Based in large part upon Professor John E Harrigan's innovative executive program for architects at California Polytechnic State University The Executive Architect fills that critical gap in professional education In addition to schooling designers in a wide range of crucial business concepts tools and techniques it provides a complete blueprint for transforming a practice from one based on the fulfillment of commissioned services to one based on an ongoing engagement with every aspect of clients worlds their goals risks opportunities and unique corporate cultures In creating this innovative guide authors Harrigan and Neel drew on the experiences of more than a dozen of the nation's most respected executive architects including Arthur Gensler Charles Luckman and Judy Rowe Throughout the book these industry leaders offer their insights advice and guidance on a wide range of topics from leadership to benchmarking from forming strategic partnerships to building knowledge base systems Also featured throughout the book are numerous instructive case studies Based on the Harvard Business School model these studies present a broad array of successful decision making examples The Executive Architect helps designers acquire the skills needed to expand beyond the boundaries of current practice and to exploit the unlimited opportunities and challenges of doing business in the new world economic order

Architecture, 1916 **Architects on Architects** Susan Gray, 2001-09-06 Architects on Architects Susan Gray Here's a profound stirring study of how the world's greatest architects influenced the work of others and why told in the architect's own dramatic and awe-filled words The contributors discuss the career inspiring achievements of their mentors designers of some of the most famous structures on earth They delve into their own design philosophy and how the genius of others affected their careers their goals as well as their lives This candid personal testimony imparts the emotion inspiration and wonderment of architecture and vividly demonstrate the power of mentorship and the potential it can unleash Each original essay is beautifully illustrated with photographs most in full color of both the architect's work and that of his mentor providing a visually stunning forum for comparison and learning An ideal book for architecture aficionados ARCHITECTS ON ARCHITECTS captures the soul inspiration and majesty of architecture Susan Gray New York NY is an architectural photographer and writer who has worked with many large corporations and magazines

[Philosophy for Architects](#) Branko Mitrovic, 2012-03-20 Philosophy for Architects is an engaging and easy to grasp introduction to philosophical questions of interest to students of architectural theory Topics include Aristotle's theories of visual imagination and their relevance to digital design the problem of optical correction as explored by Plato Hegel's theory of zeitgeist and Kant's examinations of space and aesthetics among others Focusing primarily on nineteenth and twentieth century philosophy it provides students with a wider perspective concerning philosophical problems that come up in contemporary architectural debates

Five Architects Museum of Modern Art (New York, N.Y.), 1975 Five Architects originally published in 1975 grew out of a meeting of the CASE group Conference of Architects for the Study of the Environment held at the Museum of Modern Art in 1969 The purpose of this gathering was to exhibit and criticize the work

of five architects Eisenman Graves Gwathmey Hejduk and Meier who constituted a New York school and who are now among the most influential architects working today The buildings shown here have more diversity than one might expect from a school but share certain properties of form scale and treatment of material Collectively their work makes a modest claim it is only architecture not the salvation of man and the redemption of the earth Providing complete drawings and photographic documentation this collection also includes a comparative critique by Kenneth Frampton an Introduction by Colin Rowe that suggests a still broader context for the work as a whole and two short texts in which individual positions are outlined Now back in print *Five Architects* serves as a reference to the early work of some of America s most important architects and provides us with a glimpse back at the direction of architecture as they saw it over twenty years ago *The Groundbreakers* Charles E. Dagit,2017-07-05 If there is anything to be learned from the history of American architecture it is that it reflects the American adventure in creativity and inventiveness and the desire to be unique and expressive In *The Groundbreakers* Charles E Dagit Jr examines pioneering American architects and the historical events and trends that gave rise to their achievements These architects the caliber of Frank Lloyd Wright and Frank Gehry created their own distinct personal styles and represented the rich heritages of their specific geographical regions The American pioneer spirit of individualism is alive and well in the architectural world and like other American innovations architecture as practiced in the United States is constantly renewing itself and finding new ways to capture the imagination This book will be of interest to historians architects and students in American studies Illustrations add dimension to the author s observations **Color for Architects (Architecture Brief)** Juan Serra Lluch,2019-05-14 As far back as the earliest Greek temples color has been an integral part of architecture but also one of its least understood elements Color theory is rarely taught in architecture schools leaving architects to puzzle out the hows and whys of which colors to select and how they interact complement or clash *Color for Architects* is profusely illustrated and provides a clear concise primer on color for designers of every kind This latest volume in our *Architecture Briefs* series combines the theoretical and practical providing the basics on which to build a fuller mastery of this essential component of design A wealth of built examples exercises and activities allows students to apply their learning of color to real world situations *Architects After Architecture* Harriet Harriss,Rory Hyde,Roberta Marcaccio,2020 What can you do with a degree in architecture Where might it take you What kind of challenges could you address *Architects After Architecture* reframes architecture as a uniquely versatile way of acting on the world far beyond that of designing buildings In this volume we meet forty practitioners through profiles case studies and interviews who have used their architectural training in new and resourceful ways to tackle the climate crisis work with refugees advocate for diversity start tech companies become leading museum curators tackle homelessness draft public policy become developers design videogames shape public discourse and much more Together they describe a future of architecture that is diverse and engaged expanding the limits of the discipline and offering new paths forward in times of crisis Whether you are an

architecture student or a practicing architect considering a change you'll find this an encouraging and inspiring read The Architect Maggie Toy, 2001 The objective of this book is to banish the notion of architecture being a male dominated field by showcasing the work of a wide variety of world class women architects demonstrating the role women are playing in contemporary architecture First book of its kind to survey the role of women in architecture Features a wide international selection of world class contemporary women architects Beautifully illustrated throughout Conversations on Architecture SERGISON ET AL, 2021-07-12 Ten conversations on current issues and timeless aspects of architecture form an inspirational reader for both professionals and anyone with an interest in architecture Sergison Bates architects established in 1996 and today running offices in London Zurich and Brussels have made a name for themselves with projects ranging from housing to care homes from educational and cultural institutions to urban scale regeneration designs Since the outset the partners have engaged with the debate within the professions and have curated a number of exhibitions about the themes they explore in their teaching and practice This book features ten conversations Jonathan Sergison Stephen Bates and Mark Tuff have conducted with prominent Swiss based architects historians and researchers and in which they reflect with their guests on the many aspects of making teaching and writing architecture Topics and guests include Learning from the European City Roger Diener The Provocation of Sustainability Sascha Roesler Rethinking Housing Conventions Jean Paul Jaccaud Learning from the Recent Past Stanislaus von Moos Thinking and Writing Martin Steinmann Exploring Construction Roger Boltshauser Shaping Public Space Maria Conen and Raoul Sigl Finding and Repurposing Elisabeth and Martin Boesch Lessons from Teaching Ludovica Molo and Working Methods Oliver L tjens and Thomas Padmanabhan The lively dialogues draw shared experiences in practice teaching and research and form an inspirational reader for anyone with a deeper interest in architectural practice **Architects to the Nation** Antoinette J. Lee, 2000-04-20 This unique book traces the evolution and accomplishments of the office that from 1852 until 1939 held a virtual monopoly over federal building design Among its more memorable buildings are the Italianate U S Mint in Carson City the huge granite pile of the State War and Navy Building in Washington D C the towering U S Post Office in Nashville New York City's neo Renaissance customhouse and such restorations as the ancient adobe Palace of the Governors in Santa Fe In tracing the evolution of the Office and its creative output Antoinette J Lee evokes the nation's considerable efforts to achieve an appropriate civic architecture **The Theory of Architecture** Paul-Alan Johnson, 1994-04-18 The Theory of Architecture Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well

as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopic thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic s use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text

A Living Architecture John Rattenbury, 2000 After Frank Lloyd Wright s death in 1959 some of those who had studied and worked with the visionary American architect stayed on at Taliesin and formed Taliesin Architects The group s aim is to create buildings in harmony with nature to embrace lifelong learning to make a positive contribution to the way people live and to keep Wright s vision alive while experimenting within its parameters
