Architectural competitions Cees de Jong, Erik Mattie, 1994 **Architectural Competitions 1950-today** Cees de Jong, 1994 **Architectural Competitions 1950-Today** Cees de Jong Mattie (Erik), 1994 Bind 2 **Architectural competitions 1950- today** Cees De Jong, 1994 **Architecture Competition** Ignaz Strebler, Jan Silberberger, 2017-02-24

Much valued by design professionals controversially discussed in the media regularly misunderstood by the public and systematically regulated by public procurement in recent years architecture competitions have become projection screens for various and often incommensurable desires and hopes Almost all texts on architectural competition engage it for particular reasons whether these be for celebration of the procedure or dismissal Moving on from such polarised views Architecture Competition is a revelatory study on what really happens when competitions take place But the story is not just about architecture and design it is about the whole construction process from the definition of the spatial programme to judgement and selection of projects and the realization of the building This book explores the competition in the building process as it takes place but also before and after its execution It demonstrates that competitions are not just one step of many to be taken but that competitive design procedures shape the entire process Along the way the book exposes among others one of the key evolutions of design competitions that competition procedures need to be regulated in order to respond to public awarding rules and need to integrate an increasing amount of given standards regarding for example efficiency fire safety and thermal comfort These notions force competing architects to respond to inflexible and overloaded competition programmes instead of focusing on genuinely crafting an architectural project If the architecture competition wants to be more highly valued as a design tool it should pay attention to the iterative nature of design and to the fact that perspectives on the problem often change in process

Design by Competition Jack L. Nasar, 1999-02-28 What meanings do buildings and places convey to the people who use and visit them Too often design competitions and signature architecture result in costly eyesores that do not work How can sponsors and clients get more meaningful results In answer to these questions Dr Nasar supported by riveting studies of competitions and Peter Eisenman's competition winning design for the Wexner Center at the Ohio State University suggests the use of pre jury evaluation PJE He shows the potential value of this approach as well as visual quality programming for many kinds of environmental design for which the client wants to convey certain desirable meanings The studies from those specific to the Wexner Center to those covering the scope of history point to an alternative method for shaping the visual form of buildings places and cities
