

Architecture Of Animals

**William Audsley, George Ashdown
Audsley**

Architecture Of Animals:

Animal Architecture Michael Henry Hansell, 2005-01-27 Construction behaviour occurs across the entire spectrum of the animal kingdom and affects the survival of both builders and other organisms associated with them Animal Architecture provides a comprehensive overview of the biology of animal building The book recognizes three broad categories of built structure homes traps and courtship displays Even though some of these structures are complex and very large the behaviour required to build them is generally simple and the anatomy for building unspecialized Standardization of building materials helps to keep building repertoires simple while self organizing effects help create complexity In a case study approach to function insects demonstrate how homes can remain operational while they grow spiderwebs illustrate mechanical design and the displays of bowerbirds raise the possibility of persuasion through design rather than just decoration Studies of the costs to builders provide evidence of optimal designs and of trade offs with other life history traits As ecosystem engineers the influence of builders is extensive and their effect is generally to enhance biodiversity through niche construction Animal builders can therefore represent model species for the study of the emerging subject of environmental inheritance Building and in particular building with silk has been demonstrated to have important evolutionary consequences This book is intended for students and researchers in comparative animal biology but will also be of relevance and use to the increasing numbers of architects and civil engineers interested in developing ideas from the animal kingdom

Animal Architecture Paul Dobraszczyk, 2023-05-17 A provocative call for architects to remember and embrace the nonhuman lives that share our spaces A spider spinning its web in a dark corner Wasps building a nest under a roof There is hardly any part of the built environment that cannot be inhabited by nonhumans and yet we are extremely selective about which animals we keep in or out This book imagines new ways of thinking about architecture and the more than human and asks how we might design with animals and the other lives that share our spaces in mind Animal Architecture is a provocative exploration of how to think about building in a world where humans and other animals are already entangled whether we acknowledge it or not

Built by Animals Mike Hansell, 2007-10-18 From termite mounds that in relative terms are three times as tall as a skyscraper to the elaborate nests of social birds and the deadly traps of spiders the constructions of the animal world can amaze and at times humble our own engineering and technology But how do creatures with such small brains build these complex structures What drives them to do it Which skills are innate and which learned Here Mike Hansell looks at the extraordinary structures that animals build whether homes traps or courtship displays and reveals the biology behind their behaviour He shows how small brained animals achieve complex feats in a small brained way by repeating many simple actions and using highly evolved self secreted materials On the other hand the building feats or tool use of large brained animals such as humans or chimps require significantly more complex and costly behaviour We look at wasp s nests leaf cutting ants caddisflies and amoebae and even the extraordinary bower bird who

seduces his mate with a decorated pile of twigs baubles feathers and berries Hansell explores how animal structures evolved over time how insect societies emerge how animals can alter their wider habitat and even whether some animals have an aesthetic sense **Zoomorphic** Victoria and Albert Museum,2003 Animal Architects James L. Gould,Carol Grant Gould,2007-03-13 Looks at why animals build explores the building processes of a variety of species and discusses how a study of animal building behavior can provides an understanding of the human mind **Animals and Architecture** David Hancocks,1971 **Built by Animals** Michael Henry Hansell,2023 From vast termite mounds that outstrip our own skyscrapers to elaborate birds nests delicate shells and deadly spiders traps the constructions of the animal world can amaze and at times humble our own engineering and technology Hansell reveals the biology behind animal architecture *Animal Architecture* Ingo Arndt,2014-04-22 Collects photographs of structures created by animals from the six foot high hills of tiny red ants to the colorfully decorated courtship arenas of the bowerbird showcasing the connections between human and animal architecture **Animal Architects** Juhani Pallasmaa,2001 Animal Architecture Karl von Frisch,Otto von Frisch,1983 **Architecture, Animal, Human** Catherine T. Ingraham,2006-02-02 Considering the historical links between architecture and the development of life sciences this text focuses on particular times of great change in these disciplines and the complex relationships between life and the environments that life creates **Animal Architects** Julio Antonio Blasco,Daniel Nassar,2015-08-04 A fantastic original exploration of how animals build their homes and the fascinating structures they create From gladiator frogs to chimpanzees learn about how animals all over the world build their homes Each spread contains a beautiful colourful illustration of each animal and its home plus a unique fold out information panel with stats and a simple architectural diagram showcasing the creation of the architect Look inside chimpanzee nests beaver dams termite mounds stork nests and many more and get to know the clever animals who build them **Animal Architecture and Building Behaviour** Michael Henry Hansell,1984 **Animal Symbolism in Ecclesiastical Architecture** Edward Payson Evans,1896 *For the Love of Pets* The Images Publishing Group,2021-09-13 Features around 50 of the most inspiring fun original and interesting ideas for super pet friendly designs for the home and other spaces Designers and architects from around the world focus on creating many quirky and ingenious designs including built in cat ladders scratchers and walkways private dog nooks and specialist kennels amazing modular mazes beautiful sculptural birdhouses and much more Focus is on creating interiors furniture and architectural environments that are for the optimal benefit of pets and other domesticated animals and using sustainable and animal friendly materials What wouldn t animal loving humans do to create the perfect modern habitat for their cherished animals Not surprisingly pet owners are forever seeking ways to provide the best environment to make life for their pets as enjoyable and engaging as possible Designing the perfect architecture and interiors for pets and animals of all shapes sizes species and breeds is all about creating a seamless coexistence Showcased here are heaps of fun and unique projects created by an inventive global design community The

charming imaginative and inspired interiors and architectural systems presented in this book offer a beautiful combination of aesthetics and creature comfort be they for cats dogs birds rabbits guinea pigs hamsters chickens turtles horses and many others This carefully curated selection includes not only ingenious yet elegant built in cat ladders scratchers and walkways and private dog nooks even a noise cancelling kennel for the most pampered of pooches but also amazing modular mazes for the busiest cat rabbit guinea pig or hamster as well as beautiful sculptural birdhouses and charming log cabin style chicken coops It also features funky cat caf s and special shelter ideas to keep both human and animal creatures calm This delightful book presents a lovable assortment of safe and sustainable pet friendly projects ideal for design and animal conscious folk who want to turn their interiors or workspaces into the most comfortable living playpen environments for their beloved fur babies and other pets to roam and rest
