Constructing Latin America Patricio del Real, 2022-05-24. A nuanced look at how the Museum of Modern Art's carefully curated treatment of Latin American architecture promoted U.S. political, economic, and cultural interests. In the interwar period and immediately following World War II, the U.S. government promoted the vision of a modern, progressive, and democratic Latin America and worked to cast the region as a partner in the fight against fascism and communism. This effort was bolstered by the work and products of many institutions, including the Museum of Modern Art, New York. Using modern architecture to imagine a Latin America under postwar U.S. leadership, MoMA presented blockbuster shows including *Brazil Builds 1943* and *Latin American Architecture since 1945* (1955), that deployed racially coded aesthetics and emphasized the confluence of Americanness and modernity in a globalizing world. Delving into the heated debates of the period and presenting never-before-published internal documents and photos from the museum and the Nelson A. Rockefeller archives, Patricio del Real is the first to fully address MoMA's role in U.S. cultural imperialism and its consequences through its exhibitions on Latin American art and architecture.

Architecture in Latin America, 1984. **Art and Architecture of Viceregal Latin America, 1521-1821** Kelly Donahue-Wallace, 2008-03-16. Kelly Donahue-Wallace surveys the art and architecture created in the Spanish Viceroyalties of New Spain, Peru, New Granada, and La Plata from the time of the conquest to the independence era. Emphasizing the viceregal capitals and their social, economic, religious, and political contexts, the author offers a chronological review of the major objects and monuments of the colonial era. In order to present fundamental differences between the early and later colonial periods, works are offered chronologically and separated by medium: painting, urban planning, religious architecture, and secular art. So the aspects of production, purpose, and response associated with each work are given full attention. Primary documents, including wills, diaries, and guild records, are placed throughout the text to provide a deeper appreciation of the contexts in which the objects were made.

Beyond the Supersquare Antonio Sergio Bessa, 2014-07-01. *Beyond the Supersquare: Art and Architecture in Latin America after Modernism*, which developed from a symposium presented by the Bronx Museum of the Arts in 2011, showcases original essays by distinguished Latin American architects, historians, and curators whose research examines architecture and urban design practices in the region during a significant period of the twentieth century. Drawing from the exuberant architectural projects of the 1940s to the 1960s, as well as from critically engaged artistic practices of the present day, the essays in this collection reveal how the heroic visions and utopian ideals popular in architectural discourse during the

modernist era bore complicated legacies for Latin America the consequences of which are evident in the vastly uneven economic conditions and socially disparate societies found throughout the region today The innovative contributions in this volume address how the modernist movement came into being in Latin America and compellingly explore how it continues to resonate in today s cultural discourse Beyond the Supersquare takes themes traditionally examined within the strict field of urbanism and architecture and explores them against a broader range of disciplines including the global economy political science gender visual arts philosophy and urban planning Containing a breadth of scholarship this book offers a compelling and distinctive view of contemporary life in Latin America Among the topics explored are the circulation of national cultural identities through architectural media the intersection of contemporary art and urban social politics and the recovery of canonically overlooked figures in art and architectural histories such as Lina Bo Bardi and Joao Filgueiras Lima Lele from Brazil Juan Legarreta of Mexico and Henry Klumb in Puerto Rico **Radical** Miquel Adrià, Andrea Griborio, 2017-11-21 Fifty architectural projects built in Latin America between 2010 and 2015 by architects under 50 years of age The publication brings together works from 13 different countries
