Architecture After Geometry Maggie Toy, 1997 This issue features and explores architectural and urban design projects which derive from non Euclidean geometries Architecture After Geometry Donald Bates, 1997-05

Computation Works Xavier De Kestelier, Brady Peters, 2013-04-15 Architects are now taking advantage of the computer in new ways through experimentation with algorithmic and simulation driven design Computation Works The Building of Algorithmic Thought focuses on this emerging theme in design practice showcasing built and soon to be built projects and providing a state of the art in computational design Computational design is considered to be first a design tool and second a series of instruments that can be applied in the creation of architecture It allows architects to incorporate performance analysis and knowledge about material tectonics and the parameters of production machinery Moving towards a new role as hybrid practitioners architects are taking concepts from other disciplines and customising architectural and other CAD software In addition to the discussion of built projects a further series of texts examines new custom software instruments New digital tools provide new modes of representation new methods of evaluation and new techniques for design exploration The development of new computational tools can create more responsive designs allowing architects to explore new design options and to analyse architectural decisions during the design process This issue raises important questions such as How is computation changing the way architects design Are the design tools and methods related to the result What is computational design in the context of architectural practice and How is computation changing the processes of design and construction *Subnature: Architecture's Other Environments* David Gissen, 2009-10-07 This book examines experimental work by today's leading designers scholars philosophers and biologists that rejects the idea that humans can somehow

recreate a purely natural world free of the untidy elements that actually constitute nature **Narrative Architecture** Sylvain De Bleeckere, Sebastiaan Gerards, 2017-02-24 Narrative Architecture explores the postmodern concept of narrative architecture from four perspectives thinking imagining educating and designing to give you an original view on our postmodern era and architectural culture Authors Sylvain De Bleeckere and Sebastiaan Gerards outline the ideas of thinkers such as Edmund Husserl Paul Ricoeur Emmanuel Levinas and Peter Sloterdijk and explore important work of famous architects such as Daniel Libeskind and Frank Gehry as well as rather underestimated architects like Gnter Behnisch and Sep Ruf With more than 100 black and white images this book will help you to adopt the design method in your own work

Mappings Denis Cosgrove, 1999-04-01 Mappings explores what mapping has meant in the past and how its meanings have altered How have maps and mapping served to order and represent physical social and imaginative worlds How has the practice of mapping shaped modern seeing and knowing In what ways do contemporary changes in our experience of the world alter the meanings and practice of mapping and vice versa In their diverse expressions maps and the representational processes of mapping have constructed the spaces of modernity since the early Renaissance The map's spatial fixity its

capacity to frame control and communicate knowledge through combining image and text and cartography's increasing claims to scientific authority make mapping at once an instrument and a metaphor for rational understanding of the world. Among the topics the authors investigate are projective and imaginative mappings, mappings of terraqueous spaces, mapping and localism at the chorographic scale, and mapping as personal exploration. With essays by Jerry Brotton, Paul Carter, Michael Charlesworth, James Corner, Wytan Curnow, Christian Jacob, Luciana de Lima, Martins, David Matless, Armand Mattelart, Lucia Nuti, and Alessandro Scafì. *Catalogue of the Officers and Students in Yale College*, Yale University, 1917
