Louis Kahn John Lobell, 2020-06-30 For everyone interested in the enduring appeal of Louis Kahn this book demonstrates that a close look at how Kahn put his buildings together will reveal a deeply felt philosophy Louis I Kahn is one of the most influential and poetic architects of the twentieth century a figure whose appeal extends beyond the realm of specialists In this book noted Kahn expert John Lobell explores how Kahn's focus on structure respect for materials clarity of program and reverence for details come together to manifest an overall philosophy Kahn's work clearly conveys a kind of transcendent rootedness a rootedness in the fundamentals of architecture that also asks soaring questions about our experience of light and space and even how we fit into the world In *Louis Kahn Architecture as Philosophy* John Lobell seeks to reveal how Kahn's buildings speak to grand humanistic concerns Through examinations of five of Kahn's great buildings the Richards Medical Research Building in Philadelphia the Salk Institute for Biological Studies in La Jolla the Phillips Exeter Academy Library in New Hampshire the Kimbell Art Museum in Fort Worth and the Yale Center for British Art in New Haven Lobell presents a clear but detailed look at how the way these buildings are put together presents Kahn's philosophy including how Kahn wishes us to experience them An architecture book that touches on topics that addresses the universal human interests of consciousness and creativity *Louis Kahn Architecture as Philosophy* helps us understand our place and the nature of well being in the built environment

*Architecture as Philosophy*, 2005 At the start of this book Imre Makovecz gently criticises the commentators who first brought his work to the West He is grateful to them of course but he claims they only half understood simplifying and misinterpreting They presented him as a heroic rebel against the communist system rather than seeing his battle against a larger enemy that we all still face this he calls impersonal intelligence When he remarks that architecture is not regarded as an art in Hungary but as a service and that it has no place in the Ministry of Culture we find it all too familiar It is perhaps understandable that someone so concerned with cultural memory especially long repressed folk memories should arise in much oppressed Hungary which was fought over for millennia even before the advent of the Soviet Empire but the same cultural amnesia is occurring throughout the world exhibited in increasing rootlessness and placelessness Perhaps the most misleading reading of all has been Makovecz the wild man or primitive but this book shows him to be a highly articulate architectural philosopher and intellectual conversant from the start with a wide range of international sources There is much more to the work than the expressive image we first encounter It warmly embraces place and community and quite aside from its ecological dimension there is a concern with the building process and the participation of craftsmen that would have warmed William Morris heart Most bold and most intriguing is Makovecz's claim to be tapping into ancient and universal folk memories that are lodged in hand made patterns gestures and even dance Over the last century we have had to revise our sense of civilisation for cities and writing are but five thousand years old yet our forebears tens of thousand years ago could scarcely have been less intelligent and communicative than ourselves

Philosophy of Architecture Christian Illies,Nicholas Ray,Nicholas Ray (historien d'art).),2014 This little handbook acts as a brief introduction to philosophical ideas and how they intersect with architecture its reception and appreciation as well as its practice It suggests that since design is the core human discipline being the only activity that involves the imaginative conception of ideas leading to artifacts that are realised as actual constructions in the world architecture itself can be regarded as a way of overcoming philosophical tensions by suggesting practical possibilities namely designs that appear to bridge between rival theories and approaches

**A Philosopher Looks at Architecture** Paul Guyer,2021-05-20 What should our buildings look like Or is their usability more important than their appearance Paul Guyer argues that the fundamental goals of architecture first identified by the Roman architect Marcus Pollio Vitruvius good construction functionality and aesthetic appeal have remained valid despite constant changes in human activities building materials and technologies as well as in artistic styles and cultures Guyer discusses philosophers and architects throughout history including Alberti Kant Ruskin Wright and Loos and surveys the ways in which their ideas are brought to life in buildings across the world He also considers the works and words of contemporary architects including Annabelle Selldorf Herzog and de Meuron and Steven Holl and shows that despite changing times and fashions good architecture continues to be something worth striving for This new series offers short and personal perspectives by expert thinkers on topics that we all encounter in our everyday lives

Benjamin,2000-01-01 Architectural Philosophy is the first book to outline a philosophical account of architecture and to establish the singularity of architectural practice and theory This dazzling sequence of essays opens out the subject of architecture touching on issues as wide ranging as the problem of memory and the dystopias of science fiction Arguing for the indissolubility of form and function Architectural Philosophy explores both the definition of the site and the possibility of alterity The analysis of the nature of the present and the complex structure of repetition allows for the possibility of judgement a judgement that arises from a reworked politics of architecture

*Persian Influence on Art, Architecture, Philosophy and Culture of Indian Subcontinent* Dr Anu Dhawan,2023-01-03 Indo Iranian cultural relations are a continuous historical process starting from the gray dawn of the common united life of the ancestors of these twoi great Asian civilizations as part and parcel of the original Indo European stock The process has unfolded itself in history through alternate phases of harmony and conflict and has percolated down to

our times The ancestors of Iranian and Indian Aryans of history are believed to have lived in a common habitat in Central Asia as an undivided ethnic group from the fourth millennium to that of the third millennium B C They shared a common life experience and were inextricably linked up on the cultural level in spite of their numerous internal differences and conflicts From this common habitat the inhabitants migrated in two branches towards the west and the east between circa 4000 and 3000 B C Those who moved towards the east entered Iran and India where they were to develop their distinctive civilizations throughout the succeeding ages The undivided Indo Iranians are believed to have lived for about a millennium circa 4000 3000 B C In this period they lived a common life and developed a specific Indo Iranian civilization culture and religion which we can partially reconstruct by a comparative study of the Veda and the Zend Avesta There are amazing similarities in their language culture and religion which strike us as little short of identity From time immemorial the Orient has been the cradle of civilization that amongst all other Oriental countries Iran and India stand first and foremost in their contribution to world culture and that these two nations were the torch bearers of knowledge the forerunners of a fine civilization at a time when the civilized countries of the modern world were still plunged in dim obscurity of ignorance countries of modern world were still plunged in dim obscurity of ignorance Linguistic affinities national kinship and distinctive racial characteristics constitute the inseparable bonds of friendship and fellowship that have brought the two nations together from the earliest times throughout the course of history These two countries have been tied together by strong and lasting bonds and both in ancient times and during the medieval era their cultures have profited mutually by a continual exchange of knowledge and ideas These lasting ties prompted Jawaharal Nehru the first Prime Minister of independent India to write in his famous book *Discovery of India* Dr Anu Dhawan [Philosophy and Design](#) Pieter E. Vermaas, P.A. Kroes, Andrew Light, Steven Moore, 2007-12-05 This volume provides the reader with an integrated overview of state of the art research in philosophy and ethics of design in engineering and architecture It contains twenty five essays that focus on engineering designing in its traditional sense on designing in novel engineering domains and on architectural and environmental designing This volume enables the reader to overcome the traditional separation between engineering designing and architectural designing

**Architecture, Philosophy, and the Pedagogy of Cinema** Nadir Lahiji, 2021-05-26 Philosophers on the art of cinema mainly remain silent about architecture Discussing cinema as mass art they tend to forget that architecture before cinema was the only existing mass art In this work author Nadir Lahiji proposes that the philosophical understanding of the collective human sensorium in the apparatus of perception must once again find its true training ground in architecture Building art puts the collective mass in the position of an expert critic who identifies themselves with the technical apparatus of architecture Only then can architecture regain its status as mass art and as the book contends only then can it resume its function as the only artform that is designed for the political pedagogy of masses which originally belonged to it in the period of modernity before the invention of cinema **Intercultural Architecture** Kishō Kurokawa, 1991 Here architect Kurokawa

Michael Hays, 2000-02-28 An anthology of the pivotal theoretical texts that have defined architecture culture in the late twentieth century In the discussion of architecture there is a prevailing sentiment that since 1968 cultural production in its traditional sense can no longer be understood to rise spontaneously as a matter of social course but must now be constructed through ever more self-conscious theoretical procedures The development of interpretive modes of various stripes post-structuralist Marxian phenomenological psychoanalytic as well as others dissenting or eccentric has given scholars a range of tools for rethinking architecture in relation to other fields and for reasserting architecture's general importance in intellectual discourse This anthology presents forty-seven of the primary texts of architecture theory introducing each with an explication of the concepts and categories necessary for its understanding and evaluation It also presents twelve documents of projects or events that had major theoretical repercussions for the period Several of the essays appear here in

*Phenomenologies of the City* Dr Henriette Steiner, Dr Maximilian Sternberg, 2015-04-28 Phenomenologies of the City Studies in the History and Philosophy of Architecture brings architecture and urbanism into dialogue with phenomenology Phenomenology has informed debate about the city from social sciences to cultural studies Within architecture however phenomenological inquiry has been neglecting the question of the city Addressing this lacuna this book suggests that the city presents not only the richest but also the politically most urgent horizon of reference for philosophical reflection on the cultural and ethical dimensions of architecture The contributors to this volume are architects and scholars of urbanism Some have backgrounds in literature history religious studies and art history The book features 16 chapters by younger scholars as well as established thinkers including Peter Carl David Leatherbarrow Alberto Perez Gomez Wendy Pullan and Dalibor Vesely Rather than developing a single theoretical statement the book addresses architecture's relationship with the city in a wide range of historical and contemporary contexts The

chapters trace hidden genealogies and explore the ruptures as much as the persistence of recurrent cultural motifs Together these interconnected phenomenologies of the city raise simple but fundamental questions What is the city for how is it ordered and how can it be understood The book does not advocate a return to a naive sense of unity or order Rather it investigates how architecture can generate meaning and forge as well as contest social and cultural representations

*Deleuze and Architecture* Helene Frichot,2013-05-31 This collection looks critically at how Deleuze challenges architecture as a discipline how architecture contributes to philosophy and how we can come to understand the complex politics of space of our increasingly networked world

**The Missed Encounter of Radical Philosophy with Architecture** Nadir Lahiji,2014-04-10 The Missed Encounter of Radical Philosophy with Architecture brings together a respected team of philosophers and architecture scholars to ask what impact architecture has over today's culture and society For three decades critical philosophy has been in discourse with architecture Yet following the recent radical turn in contemporary philosophy architecture's role in contemporary culture is rarely addressed In turn the architecture discourse in academia has remained ignorant of recent developments in radical philosophy Providing the first platform for a debate between critics architects and radical philosophers this unique collection unties these two schools of thought Contributors reason for or against the claim of the missed encounter between architecture and radical philosophy They discuss why our prominent critical philosophers devote stimulating writings to the ideological impact of arts on the contemporary culture music literature cinema opera theatre without attempting a similar comprehensive analysis of architecture By critically evaluating recent philosophy in relation to contemporary architecture The Missed Encounter of Radical Philosophy with Architecture presents a thorough understanding of the new relationship between architecture and radical philosophy

*Creative Ecologies* Hélène Frichot,2018-12-13 Architect and philosopher Hélène Frichot examines how the discipline of architecture is theorized and practiced at the periphery Eschewing a conventionally direct approach to architectural objects to iconic buildings and big name architects she instead explores the background of architectural practice to introduce the creative ecologies in which architecture exists only in relation to other objects and ideas Consisting of a series of philosophical encounters with architectural practice that are neither neatly located in one domain nor the other this book is concerned with other ways of doing architecture It examines architecture at the limits where it is muddied by alternative disciplinary influences whether art practice philosophy or literature Frichot meets a range of creative characters who work at the peripheries and who challenge the central assumptions of the discipline showing that there is no core of architecture there is rather architecture as a multiplicity of diverse concerns in engagement with local environments and worlds From an author well known in the disciplines of architecture and philosophy for her scholarship on Deleuze this is a radical accessible and highly original approach to design research deftly engaging with an array of current topics from the Anthropocene to affect theory new materialism to contemporary feminism
