[Behavioral Architecture](#) Clovis Heimsath, 1977 Based on a new concept in architecture this volume shows how to use the findings of behavioral psychology to create more meaningful architectural designs It is one of the first

synthesis by a practicing architect of what has been learned about the interaction of architecture and human behavior In the process the author looks at old problems in new ways adding a new dimension to present architectural practices Although its approach to architecture is unique the book is primarily a practical work Its main points are solidly supported by a detailed behavioral design process model a step by step procedure for using behavior in contemporary design Jacket Environment and Planning ,2003 Journal of urban planning and design Publishes research in the application of formal methods methods models and theories to spatial problems involving the built environment and the spatial structure of cities and regions Includes the application of computers to planning and design in particular the use of shape grammars artificial intelligence and morphological methods to buildings and towns the use of multimedia and GIS in urban and regional planning and the development of ideas concerning the virtual city Speaking with Houses Michael Linzey,2025-09-16 This book critically examines the concept of Being in Western philosophy and its manifestation in architecture The book traverses diverse cultural and historical contexts analysing five architectural works the Djoser Step Pyramid in ancient Egypt the Pantheon in imperial Rome the Tai an tea house in late medieval Japan the Te Tokanganui a Noho meeting house in colonial New Zealand and Mies van der Rohe s Seagram Building in modern New York Through these case studies it challenges Martin Heidegger s assertion that language is the house of Being proposing instead that Being is a construct specific to Western ontology By exploring architectural poiesis across various cultures the book reveals that the Western notion of Being is not a universal foundation for architectural creation Each examined structure embodies distinct cultural and philosophical principles such as the concept of m in Japanese tea houses which signifies neither Being nor non Being and the no Being tradition in M ori tikanga This comparative analysis underscores the diversity of architectural expressions and their underlying philosophies offering readers a nuanced understanding of how different cultures conceptualize existence and space This book is an invaluable resource for scholars in architecture philosophy and cultural studies Its interdisciplinary approach provides a comprehensive critique of Western metaphysical assumptions encouraging readers to reconsider the relationship between language being and architectural form By integrating architectural analysis with philosophical inquiry it fosters a deeper appreciation of cultural diversity in architectural practices and invites academics to explore alternative ontological perspectives in the built environment **A Life in Architecture** James Birrell,2014-04-01 In A Life In Architecture James Birrell reflects on his life in architecture the influence of architect Roy Grounds his respect for Walter Burley Griffin s original Canberra plan and his emphasis on the value of incorporating the landscape in its entirety into building design and planning and his own significant contribution to Australia s post war architecture Birrell writes candidly about Queensland s lacklustre approach to town planning during the 1950s the iconic buildings he designed in his years as Chief Architect for Brisbane City Council and the revolutionary planning schemes he developed at The University of Queensland and James Cook University in Papua New Guinea and regional Queensland Now at the age of 84 Birrell comments on Robin Boyd s 1960 book
