Architecture In The Netherlands Yearbook 2000/2001:

Architecture in the Netherlands Jo Coenen, 2001 The important annual Architecture in the Netherlands offers a selection of the most notable recent architecture in Holland highlighting trends and subjecting them to in depth analysis **Ten Years, Realized Works** Erick van Egeraat, 2005 The work of EEA as presented in this retrospective of the past 10 years of its work covers the full architectural gamut including public educational residential interior design exhibition design and the design of furniture and objects **Meyer en Van Schooten Architects: Ing Group Headquarters** Hans Ibelings, Meyer en Van Schooten Architecten, 2003 The headquarters of the ING Group in Amsterdam is one of the most spectacular buildings of our time Even before construction began the design by Roberto Meyer and Jeroen van Schooten had etched itself into the public consciousness immediately attracting such nicknames as the shoe the handyvac and the TGV The ING head office is more than just an eye catching form This is only one aspect of the complex unity of form space construction technique and detail achieved by this architecture This book takes in depth cognisance of this extraordinary building from its mind boggling structure and perfect detailing to its wealth of ambiences and spatiality The architects themselves provide a well founded and precisely detailed description of how their architecture fits together and why this is so Plans sections and a great many details complete this building monograph together with stunning photographs from George Fessy **TransUrbanism** Joke Brouwer, Arjen Mulder, 2002 TransUrbanism is urbanism plus transformation TransUrbanism is urbanism plus globalization The city is no longer a clearly localizable spatial unit but has transformed into an urban field a collection of activities instead of a material structure Cities today are in a state of continuous decomposition but are also continually reorganizing and rearranging themselves expanding and shrinking TransUrbanism is a design strategy that allows cities to organize themselves as complex systems where small local structures incorporate global flows BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Mecanoo: Van Fragmentarisch Naar Monumentaal Francine Houben, Aaron Betsky, Ruud Brouwers, 2008 Presents a profile of a contemporary European architectural practice emphasizing sustainability and social responsibility **Unmodern Architecture** Hans Ibelings, 2004 In the Netherlands for decades a bastion of modernism neomodernism and supermodernism a contemporary traditionalism has been causing a stir since the 1990s Traditionalists draw from the past and prefer means that have already proved their worth Contemporary traditionalism stripped of all populist and moralistic arguments for and against is analysed from different angles including an international and historical perspective **The International Yearbook of Environmental and Resource Economics 2000/2001** Tom Tietenberg, Henk Folmer, 2000-05-25 There has been an explosion in the literature and research on environmental and resource economics in recent years This major annual publication provides a cutting edge survey of current research by the leading experts in the field **Materiality in Roman Art and Architecture** Annette Haug, Adrian Hielscher, M. Taylor Lauritsen, 2021-12-31 The focus of this volume is on the aesthetics semantics and function of materials in

Roman antiquity between the 2nd century B C and the 2nd century A D It includes contributions on both architectural spaces and their material design and objects types of artefacts that differ greatly in the way they were used perceived and loaded with cultural significance With respect to architecture the analysis of material aesthetics leads to a new understanding of the performance imitation and transformation of surfaces including the social meaning of such strategies In the case of objects surface treatments are equally important However object form a specific design category which can enter into tension with materiality comes into particular focus Only when materials are shaped do their various qualities emerge and these qualities are to a greater or lesser extent transferred to objects With a focus primarily on Roman Italy the papers in this volume underscore the importance of material design and highlight the awareness of this matter in the ancient world **Liesbeth**

Van Der Pol Liesbeth van der Pol, Eelco Beukers, Geert Bekaert, 2002 This monograph throws light on twelve of Liesbeth van der Pol's most noteworthy projects with a number of photographs ground plans and sketches The illustrations give a good impression of how remarkably multi faceted her oeuvre is making it very hard to fit into the well known architectural schools or building traditions That is why the essays by Eelco Beukers and Geert Bekaert seek constants in her work constants that lie not so much in the external appearance of the buildings as in her way of looking her approach and her deeply rooted ideas about the relation between people and buildings **BOOK JACKET** Title Summary field provided by Blackwell North America Inc All Rights Reserved **Books in Print**, 2002 *Archis*, 2002 *Annales de l'architecture en Flandre*, 2006

Architectuur in Nederland, 2004 **Books in Print, 2005-2006** Michael Cairns, 2005 □□□□, 2003-04 Includes special issues and extra issues **Abitare**, 2002 **The Low Countries** Stichting Ons Erfdeel, 2006 **The Art of Allusion** Sonja Drimmer, 2018-09-21 At the end of the fourteenth and into the first half of the fifteenth century Geoffrey Chaucer John Gower and John Lydgate translated and revised stories with long pedigrees in Latin Italian and French Royals and gentry alike commissioned lavish manuscript copies of these works copies whose images were integral to the rising prestige of English as a literary language Yet despite the significance of these images manuscript illuminators are seldom discussed in the major narratives of the development of English literary culture The newly enlarged scale of English manuscript production generated a problem namely a need for new images Not only did these images need to accompany narratives that often had no tradition of illustration they also had to express novel concepts including ones as foundational as the identity and suitable representation of an English poet In devising this new corpus manuscript artists harnessed visual allusion as a method to articulate central questions and provide at times conflicting answers regarding both literary and cultural authority Sonja Drimmer traces how just as the poets embraced intertextuality as a means of invention so did illuminators devise new images through referential techniques assembling adapting and combining images from a range of sources in order to answer the need for a new body of pictorial matter Featuring more than one hundred illustrations twenty seven of them in color **The Art of Allusion** is the first book devoted to the emergence of England's literary canon as a visual as

well as a linguistic event **Architecture in the Netherlands** Teun van den Ende, 2021-08-10 The essential annual overview of contemporary Dutch architecture For 30 years Architecture in the Netherlands has been the international showcase for Dutch architecture The editors of the newest edition select noteworthy projects from 2019 to 2020 and describe the most significant developments and trends influencing the field *Architecture in the Netherlands*, 1999
