An Architecture of Invitation Sarah Menin, Stephen Kite, 2018-08-09 First published in 2005 An Architecture of invitation Colin St John Wilson is a distinctive study of the life and architectural career of one of the most significant makers theorists and teachers of architecture to have emerged in England in the second half of the twentieth century Exceptionally in an architectural study this book interweaves biography critical analysis of the projects and theory in its aims of explicating the richness of Wilson s body of work thought and teaching Drawing on the specialisms of its authors it also examines the creative and psychological impulses that have informed the making of the work an oeuvre whose experiential depth is recognised by both users and critics [An Architecture of Invitation](#) SARAH. KITE MENIN (STEPHEN.), Stephen Kite, 2020-04-02 First published in 2005 An Architecture of invitation Colin St John Wilson is a distinctive study of the life and architectural career of one of the most significant makers theorists and teachers of architecture to have emerged in England in the second half of the twentieth century Exceptionally in an architectural study this book interweaves biography critical analysis of the projects and theory in its aims of explicating the richness of Wilson s body of work thought and teaching Drawing on the specialisms of its authors it also examines the creative and psychological impulses that have informed the making of the work an oeuvre whose experiential depth is recognised by both users and critics **Architecture an Inspiration** Ivor Smith, 2014-11-28 This book is about appreciation it is an attempt to explain what architecture essentially is rather than merely what it looks like Architecture an Inspiration is addressed to those who enjoy buildings cities and landscapes and would like to have a deeper appreciation and a basis for their likes and dislikes A full appreciation demands careful observation and in these pages there are many explorations of this sort The book is divided into two parts the first is about the nature of architecture describing what is necessary The chapter headings define the basic requirements that to varying degrees must always be met such as facilitating activity moderating climate relating to context respecting materials and structure as well as conveying meaning and delight The second part is about the nature of designing and focuses on what the designer brings to the task to arrive at a human and poetic synthesis These different ways of thinking are elusive and not necessarily conscious they include the use of reason and intuition the value of experience and precedent the role of metaphor and the search for harmony For students this is difficult because there is no right way of designing So much of what is written about the architecture of today is negative that it seemed opportune to take a positive approach and point to work that is good now and in the past and reiterate some timeless qualities Architecture an Inspiration does not set out to be comprehensive Ivor Smith chooses examples that he finds particularly inspiring from the work of a few selected architects The book will appeal to those both interested in and studying architecture [Non-Design](#) Anthony Fontenot, 2021-07-09 Anthony Fontenot s staggeringly ambitious book uncovers the surprisingly libertarian heart of the most influential British and American architectural and urbanist discourses of the postwar period expressed as a critique of central design and a support

of spontaneous order Non Design illuminates the unexpected philosophical common ground between enemies of state support most prominently the economist Friedrich Hayek and numerous notable postwar architects and urbanists like Robert Venturi Denise Scott Brown Reyner Banham and Jane Jacobs These thinkers espoused a distinctive concept of non design characterized by a rejection of conscious design and an embrace of various phenomenon that emerge without intention or deliberate human guidance This diffuse and complex body of theories discarded many of the cultural presuppositions of the time shunning the traditions of modern design in favor of the wisdom freedom and self organizing capacity of the market Fontenot reveals the little known commonalities between the aesthetic deregulation sought by ostensibly liberal thinkers and Hayek s more controversial conception of state power detailing what this unexplored affinity means for our conceptions of political liberalism Non Design thoroughly recasts conventional views of postwar architecture and urbanism as well as liberal and libertarian philosophies

Scale Gerald Adler, Timothy Brittain-Catlin, Gordana Fontana-Giusti, 2013-01-11 Scale is a word which underlies much of architectural and urban design practice its history and theory and its technology Its connotations have traditionally been linked with the humanities in the sense of relating to human societies and to human form To build in scale is an aspiration that is usually taken for granted by most of those involved in architectural production as well as by members of the public yet in a world where value systems of all kinds are being questioned the term has come under renewed scrutiny The older more particular meanings in the humanities pertaining to classical Western culture are where the sense of scale often resides in cultural production Scale may be traced back ultimately to the discovery of musical harmonies and in the arithmetic proportional relationship of the building to its parts One might question the continued relevance of this understanding of scale in the global world of today What in other words is culturally specific about scale And what does scale mean in a world where an intuitive visual understanding is often undermined or superseded by other senses or by hyper reality Structured thematically in three parts this book addresses various issues of scale The book includes an introduction which sets the scene in terms of current architectural discourse and also contains a visual essay in each section It is of interest to undergraduate and postgraduate students academics and practitioners in architecture and architectural theory as well as to students in a range of other disciplines including art history and theory geography anthropology and landscape architecture

The Practice of Modernism John R. Gold, 2007-06-13 Making extensive use of information gained from hours of in depth interviews with architects this new book examines the complex relationship between vision and subsequent practice in the saga of post war urban reconstruction

Encyclopedia of Twentieth Century Architecture R. Stephen Sennott, 2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world s most notable architecture The contents feature major architects firms and professional issues buildings styles and sites the architecture of cities and countries critics and historians
