ICEL2104-Proceedings of the 9th International Conference on e-Learning Dr Oscar Saavedra Rodriguez,,Dr Teresita Arenas Yáñez,2014 *Disclosing Entrepreneurship as Practice* Bengt Johannisson,2018-08-31 Some contemporary practice theories are not well suited to studying entrepreneurship as ongoing creative organizing In order to catch the emergence of entrepreneurship the scholar has to adopt a dwelling mode and immerse themselves into the concrete doings the practices of entrepreneuring thus amalgamating the researcher and entrepreneur identities Enactive research thus means that the scholar enacts a real life venture and uses auto ethnographic methods to organize the insights being gained Two enacted year long projects are reported in detail and the methods used and the findings from the research are reported in this thought provoking book *Reconfiguration of Business Models and Ecosystems* Svetla T. Marinova,Marin A. Marinov,2023-02-10 Decoupling of business models and ecosystems is the disconnection of certain characteristic activities originally planned and completed in coincidence It could bring in an immense adverse shock in the functioning of established business models and ecosystems possibly bringing them to resilience Core causes for decoupling and resilience of business models and ecosystems are jolts known as global crisis universal pandemics etc The undesirable outcomes of critical events can reveal unique circumstances for business model and ecosystem resilience Business model and ecosystem resilience represents a mandatory prerequisite for firms challenging their functioning and even very existence Research has been conducted thus far nevertheless this theme requires significantly more consideration The key objective of this book is to bring further insights in the field delivering a thorough examination of the ways in which business models and ecosystems can develop resilience under extraordinary conditions In the book the resilience of business models and ecosystems is analysed aiming to investigate further the specifics of the relevant processes securing resilience and its outcomes The resilience of business models and ecosystems is scrutinised as a credible way for enhancing the predispositions of firm s survivability Chapter 9 of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution NonCommercial No Derivatives 4 0 license [The SAGE Handbook of Small Business and Entrepreneurship](#) Robert Blackburn,Dirk De Clercq,Jarna Heinonen,2017-12-14 The SAGE Handbook of Small Business and Entrepreneurship offers state of the art chapters on all aspects of this rapidly evolving discipline Original contributions from the best international scholars map the development of Entrepreneurship as an academic field explore its key current debates and research methods and also consider its future directions Part One The People and the Entrepreneurial Processes Part Two Entrepreneurship and Small Business Management and Organization Part Three Entrepreneurial Milieu Part Four Researching Small Business Entrepreneurship This handbook will be the leading reference book for Entrepreneurship academics and researchers as well as those from other associated disciplines including business and management psychology marketing sociology and anthropology *Entrepreneurship and the Privatizing of Government* Calvin A. Kent,1987-06-23

The chapters in this anthology combine discussion of two currently hot topics in public administration privatization and entrepreneurship Perhaps the most attractive aspect of this book is that it is not merely an unbridled emotional paean to privatization and entrepreneurship but an objective introduction to these issues The editor selects an array of essays that address not only theory and practice but also the pragmatic issues and problems associated with implementing these new policy initiatives This book would be a welcome addition to libraries wishing to remain current with the expanding literature on privatization and entrepreneurship Choice Privatization encompasses the many ways in which the private sector assumes functions that were previously the province of government These may range from the sale of state enterprises to contracts with private firms to provide governmental services In each case services which were once subsidized to some extent by the government are instead offered by the private sector at prices reflecting their actual cost This collection of original essays by internationally recognized scholars in economics government and management provides a readable state of the art discussion of the promises and problems of privatization In addition to synthesizing current data and experiences in the field of private entrepreneurship this collection of articles breaks new ground by suggesting innovative areas for private activity in the public sector

Indian Entrepreneurs Strategic Challenges Dr G vani Dr M Ganesh Babu Dr N Panchanatham,

Lessons from the Poor Alvaro Vargas Llosa, James D. Gwartney, 2008-05-01 An important contribution to the literature of economic development this book presents case studies of productive entrepreneurship in contemporary Africa and Latin America It looks at the growth of Kenya s chain stores and one person kiosks the rise of barter clubs in Argentina and Nigeria s clothing design industry to illustrate economists insights about entrepreneurship and the role that government regulations often play in impeding economic development Half the people in the world live on two dollars or less per day and roughly 600 million live on no more than one dollar per day With thousands of international relief organizations strategic government programs and billions of dollars in foreign aid why do so many underdeveloped countries remain unable to grow their economies beyond mere survival It is this issue that internationally acclaimed political analyst Alvaro Vargas Llosa and a select group of economists examine in a series of case studies from around the world These studies reveal that entrepreneurial energy can be a persistent catalyst for change But unfortunately in societies dominated by political corruption and unnecessary regulation men and women seeking to innovate must hurdle a series of challenges Wealth transfer favoritism excessive taxation and lack of institutional security all conspire against progress Our contributors examine real world examples of entrepreneurship and argue that instead of redistributing existing wealth developing countries should start working to create it *Frontiers of Entrepreneurship Research*, 2000 **Atlantic Monthly**, 1898
