Arguing About War:

Arguing about War Michael Walzer, 2004 Michael Walzer is one of the world's most eminent philosophers on the subject of war and ethics. Now for the first time since his classic *Just and Unjust Wars* was published almost three decades ago, this volume brings together his most provocative arguments about contemporary military conflicts and the ethical issues they raise. The essays in the book are divided into three sections. The first deals with issues such as humanitarian intervention, emergency ethics, and terrorism. The second consists of Walzer's responses to particular wars, including the first Gulf War, Kosovo, Afghanistan, and Iraq. And the third presents an essay in which Walzer imagines a future in which war might play a less significant part in our lives. In his introduction, Walzer reveals how his thinking has changed over time. Written during a period of intense debate over the proper use of armed force, this book gets to the heart of difficult problems and argues persuasively for a moral perspective on war.

Rethinking War And Peace Diana Francis, 2004-05-20 An entirely modern argument for the irrelevance of war as a goal in international affairs.

The Psychology of Conviction Joseph Jastrow, 1918

Blood in the Sand Stephen Bronner, 2005-10-07 Following the attacks of September 11, 2001, clouds of ash blackened the skies over New York City, Washington D.C., and rural Pennsylvania. In the wake of the destruction, the United States seemingly entered a new era marked by radical changes in the nation's discourse and in the policies of the Bush administration. With the toppling of the Taliban in Afghanistan, the invasion of Iraq, and saber rattling elsewhere, America's global war on terror began to take shape. Lofty rhetoric about expanding democracy and defending freedom filled the halls of elite power and dominated mainstream media coverage of American politics. *Blood in the Sand* offers both an incisive analysis and a confrontational critique of America's recent international pursuits and its dominant political culture. Stephen Eric Bronner challenges the notion that everything changed in the aftermath of 9/11. He shows instead how a criminal act served to legitimize political manipulation and invigorate traditional nationalistic enthusiasms for militarism and imperial expansion. Employing his own experiences in the Middle East, Bronner acknowledges but refuses to overstate recent progressive developments in the region. He criticizes the neo-conservative penchant for unilateral military aggression and debunks the dubious notion of fostering democracy at gunpoint. While Bronner analyzes authoritarian repression, human rights violations, shrinking civil liberties, and severe socioeconomic inequalities, *Blood in the Sand* is neither a narrow political diatribe nor a futile exercise in anti-American negativism. The author honors America by condemning the betrayal of the nation's finest ideals by so many of those who hypocritically or naively invoke those ideals. Most, Bronner sheds new light on those who insist on publicly waving the flag while privately subverting that for which it stands. *Blood in the Sand* sounds a clarion call for revitalizing the American polity and reshaping foreign policy along democratic lines. Committed to a political renewal, Bronner urges the American people to recall what is best about their national heritage and the genuine beacon of hope it might offer other countries and other cultures.

American Dove Zachary Shirkey, 2020-11-16

Zachary C Shirkey argues that the United States is overly reliant on the active use of force and should employ more peaceful foreign policy tools Force often fails to achieve its desired ends for both tactical and strategic reasons and is relatively inflexible making it an inappropriate tool for many US foreign policy goals Rather than relying on loose analogies or common sense as many books on US grand strategy do American Dove bases its argument directly on an eclectic mix of academic literature including realist liberal and constructivist theory as well as psychology Shirkey also argues against retrenchment strategies such as offshore balancing and strategic restraint as lacking a moral component that leaves them vulnerable to hawkish policies that employ moral arguments in favor of action US withdrawal would weaken the existing liberal international security economic and legal orders orders that benefit the United States Rather the book argues the United States needs an energetic foreign policy that employs passive uses of force such as deterrence and nonmilitary tools such as economic statecraft international institutions international law and soft power Such a policy leaves room for a moral component which is necessary for mobilizing the American public and would uphold the existing international order Last Shirkey argues that to be successful doves must frame their arguments in terms of strategy rather than in terms of costs and must show that dovish policies are consistent with national honor and a broad range of American values American Dove offers a framework for US grand strategy and a plan for persuading the public to adopt it *William Clarke* William

Clarke,1908 *Peace Forum* ,1914 **The Evolution of Humanitarian-Intervention in International Law** Cian Moran,2024-12-16 This book assesses whether humanitarian intervention exists under customary international law The main question being whether there is a right to humanitarian intervention and if so according to what criteria using historical analysis to determine its existence By combining historical and legal methods running from the nineteenth century Ottoman Empire through to the contemporary Russia Ukraine War this book determines that such a right has been extinguished under international law **How Wars End** Damien Kingsbury,Richard Iron,2022-12-27 This book addresses one of the most important issues in international relations how wars are ended The volume draws on the direct experience of both soldiers and academics who in each case have also been advisers on fighting and ending wars Unlike more theoretical works the book draws on first hand experiences in the case studies which include the wars in Iraq Afghanistan Sierra Leone and Indonesia among others The volume is constructed around a series of themes The first theme is why wars start and how they can be understood based on the assumption that knowing how and why wars start is fundamental to understanding how they might end The second is what sustains wars and what makes them difficult to end Again once wars start understanding what keeps them going is critical to how to end them The third focuses on the role of external intervention in ending wars including as a belligerent partner in war as a peacemaking or peacekeeping force and as a mediator between warring parties The fourth addresses the issue of ripeness and the right conditions for ending wars The fifth addresses the modalities for ending wars and creating peace with the sixth theme being focused on transitions to peace and what is required to help make those

transitions successful The book will be of interest to students of military strategic and security studies peace studies and International Relations

Asymmetric Killing Neil C. Renic, 2020 This book examines the moral right to kill in war and the extent to which this right is challenged by the growing capability of certain states to kill with little or no physical risk to their own forces

Our War Too Margaret Paton-Walsh, 2002 In the late 1930s a number of American women especially those allied with various peace and isolationist groups protested against the nation's entry into World War II While their story is fairly well known Margaret Paton Walsh reveals a far less familiar story of women who fervently felt that American intervention was absolutely necessary Paton Walsh recounts how the United States became involved in the war but does so through the eyes of American women who faced it as a necessary evil Covering the period between 1935 and 1941 she examines how these women functioned as political actors even though they were excluded from positions of power through activism in women's organizations informal women's networks and even male dominated lobbying groups In the Great Debate over whether America should enter the war some women favored aid to the Allies not because they hoped for war but because they hoped aid would forestall more direct U S involvement but also because they believed war was preferable to a Nazi victory Paton Walsh shows that this activism involved some of the most prominent women of their day Elizabeth Cutter Morrow whose son in law Charles Lindbergh was an isolationist spokesman supported the revision of the Neutrality Acts to allow the sale of arms to the Allies and expressed her support in a national radio broadcast Soon other women joined this debate Esther Brunauer of the AAUW journalist Dorothy Thompson and organizations like the League of Women Voters and National Women's Trade Union League broke from the pacifist tradition to advocate American aid for the Allied cause Focusing on the conflict in Europe Paton Walsh shows how these women grasped the implications of the Lend Lease program for America's entry into the war but supported it nevertheless By late 1941 the Women's Division of the Fight for Freedom Committee had been established no longer merely advocating aid to Britain to keep American boys out of battle this organization supported direct American involvement in the war as a means of stopping Nazi oppression While most historians have focused on women's pacifism Paton Walsh connects women more directly to world events and shows how those interventionists reformulated maternalist ideas to justify and explain their beliefs *Our War Too* is a story of American women trying to reconcile the irreconcilable to preserve both their principles and their peace It expands our understanding of women as political actors and thinkers about foreign policy as it sheds new light on American public opinion over the build up to the war

US Foreign Policy in the Eastern Mediterranean Spyridon N. Litsas, 2020-02-06 This book examines US foreign policy in the Eastern Mediterranean and the region's key role in the practice and evolution of American exceptionalism The political developments in the Eastern Mediterranean during the 19th and the first half of the 20th centuries gave to the US opportunities to express in the most explicit way its anti colonialism the fervent support of open and democratic societies and its willingness to openly confront tyranny and oppression whenever this
