**Aristotle Transformed** Richard Sorabji, 2016-06-30 This book brings together twenty articles giving a comprehensive view of the work of the Aristotelian commentators First published in 1990 the collection is now brought up to date with a new introduction by Richard Sorabji New generations of scholars will benefit from this reissuing of classic essays including seminal works by major scholars and the volume gives a comprehensive background to the work of the project on the Ancient Commentators on Aristotle which has published over 100 volumes of translations since 1987 and has disseminated these crucial texts to scholars worldwide The importance of the commentators is partly that they represent the thought and classroom teaching of the Aristotelian and Neoplatonist schools and partly that they provide a panorama of a thousand years of ancient Greek philosophy revealing many original quotations from lost works Even more significant is the profound influence uncovered in some of the chapters of this book that they exert on later philosophy Islamic and Western Not only did they preserve anti Aristotelian material which helped inspire Medieval and Renaissance science but they present Aristotle in a form that made him acceptable to the Christian church It is not Aristotle but Aristotle transformed and embedded in the philosophy of the commentators that so often lies behind the views of later thinkers *Aristotle Transformed* Richard Sorabji, 2016

Sergius of Reshaina, Commentary on Aristotle's >Categories< Yury Arzhanov, 2024-07-01 Sergius of Reshaina d 536 is a major figure in the history of the Syriac reception of Aristotle's logic He studied philosophy and medicine in the late 5th century in Alexandria with the famous Ammonius Hermeiou whose lectures formed the basis for Sergius main philosophical work his extensive Commentary on the Categories In this treatise Sergius adapted for his Christian audience the Alexandrian educational model and exegesis of Aristotle logical writings and in this way influenced subsequent centuries of Aristotelian studies in Syriac The commentary contains an extensive introductory part which deals with the traditional set of preliminaries prolegomena e g the general division of sciences the scope of Aristotle's logic in general and of his treatise Categories in particular etc Moreover it includes excurses in natural philosophy and contains extensive quotations from Aristotle's Physics Thus Sergius treatise not only introduced the tradition of exegesis of Aristotle to the Syriac world but provided Syriac readers with a general introduction to philosophy and logic and thus paved the way for the transmission of Greek sciences and philosophy from Alexandria to Baghdad

Contextualizing Premodern Philosophy Katja Krause, Luis Xavier López-Farjeat, Nicholas A. Oschman, 2023-01-13 This volume brings together contributions from distinguished scholars in the history of philosophy focusing on points of interaction between discrete historical contexts religions and cultures found within the premodern period The contributions connect thinkers from antiquity through the Middle Ages and include

philosophers from the three major monotheistic faiths Judaism Islam and Christianity By emphasizing premodern philosophy's shared textual roots in antiquity particularly the writings of Plato and Aristotle the volume highlights points of cross-pollination between different schools cultures and moments in premodern thought Approaching the complex history of the premodern world in an accessible way the editors organize the volume so as to underscore the difficulties the premodern period poses for scholars while accentuating the fascinating interplay between the Greek Hebrew Arabic and Latin philosophical traditions The contributors cover many topics ranging from the aims of Aristotle's cosmos the adoption of Aristotle's Organon by al-Farabi and the origins of the Plotinian Arabica to the role of Ibn Gabirol's Fons vitae in the Latin West the ways in which Islamic philosophy shaped thirteenth-century Latin conceptions of light Roger Bacon's adaptation of Avicenna for use in his moral philosophy and beyond The volume's focus on source-based contextualism demonstrates an appreciation for the rich diversity of thought found in the premodern period while revealing methodological challenges raised by the historical study of premodern philosophy

**Contextualizing Premodern Philosophy Explorations of the Greek Hebrew Arabic and Latin Traditions** is a stimulating resource for scholars and advanced students working in the history of premodern philosophy

Michael of Ephesus: On Aristotle's Nicomachean Ethics 10 with Themistius: On Virtue, 2018-12-13 The two texts translated in this volume of the Ancient Commentators on Aristotle series both compare the happiness of the practical life which is subject to the hazards of fortune with the happiness of the life of philosophical contemplation which is subject to fewer needs The first is Michael of Ephesus' 12th-century commentary on Book 10 of Aristotle's Nicomachean Ethics written alongside his commentaries on Books 5 and 9 to fill gaps in the Neoplatonists' commentaries from the 6th century He recognizes that lives of practicality and philosophy may be combined and gives his own account of the superiority of the contemplative The second is Themistius' text On Virtue written in the 4th century AD He was an important teacher and commentator on Aristotle an orator and leading civil servant in Constantinople His philosophical oration is here argued to be written in support of the Emperor Julian's insistence against the misuse of free speech by a Cynic Heraclius who had satirised him Julian had previously criticised Themistius but here he combines his political and philosophical roles in seeking to mend relations with his former pupil

**On the Writing of New Testament Commentaries** Stanley E. Porter, Eckhard J. Schnabel, 2012-09-28 The essays in On the Writing of New Testament Commentaries discuss historical hermeneutical methodological literary and theological questions that shape the writing of commentaries on the books of the New Testament While these essays honor Grant R Osborne they also represent the first sustained effort to systematically address commentary writing in the field of New Testament studies

**Inner-midrashic Introductions and Their Influence on Introductions to Medieval Rabbinic Bible Commentaries** Michel G. Distefano, 2009 The opening sections of some exegetical Midrashim deal with the same type of material that is found in introductions to medieval rabbinic Bible commentaries The application of Goldberg's form analysis to these sections reveals the new form Inner Midrashic

Introduction IMI as a thematic discourse on introductory issues to biblical books By its very nature the IMI is embedded within the comments on the first biblical verse 1 1 Further analysis of medieval rabbinic Bible commentary introductions in terms of their formal thematic and material characteristics reveals that a high degree of continuity exists between them and the IMIs including another newly discovered form the Inner Commentary Introduction These new discoveries challenge the current view that traces the origin of Bible introduction in Judaism exclusively to non Jewish models They also point to another important link between the Midrashim and the commentaries i e the decomposition of the functional form midrash in the new discursive context of the commentaries Finally the form analysis demonstrates how larger discourses are formed in the exegetical Midrashim

**On Aristotle's "Metaphysics 13-14"** Syrianus, 2006 Syrianus originally from Alexandria moved to Athens and became the head of the Academy there after the death of Plutarch of Athens Syrianus attacked Aristotle in his commentary on Books 13 and 14 of the Metaphysics just as his pupil Proclus was to do later in his commentaries on Plato This is because in Metaphysics 13 14 Aristotle himself was being thoroughly polemical towards Platonism in particular against the Academic doctrine of Form numbers and the whole concept of separable number In reply Syrianus gives an account of mathematical number and of geometrical entities and of how all of these are processed in the mind which was to influence Proclus and all subsequent Neoplatonists
