

Archetypes Of Thought

Harold Coward

Archetypes Of Thought:

Archetypes of Thought , In *Archetypes of Thought* originally published in 1991 with the title *Philosophical Grounds* Thomas Molnar follows seven basic themes of Western philosophical speculation from their development in the earliest times of systematic thought through their evolution through the centuries and civilizations to the present Some of the themes are origin and its reflection guilt of being one and the multiple the temptation of mechanization and nocturnal man The book is neither a chronological treatment of issues nor a list of philosophical schools and movements Rather it reaches for the archetypes of philosophical reasoning Molnar shows the presence of modern themes in the entire history of thinking traces technology to the first stirrings of rationalism and evinces modern man s feeling of culpability Throughout the soul is perceived as the keeper of God s and man s secret one which reflects reality and also tries to organize it according to an ontologically implanted rhythm In his new introduction Molnar explains and re examines his reasons for writing the book While the themes he covers have been widely dealt with in contemporary thought they are brought together to form an original combination of philosophical concepts *Archetypes of Thought* is an intriguing study of the evolution of philosophical thinking It is essential reading for both students and professionals of philosophy history and sociology

Theosophy and Modern Thought Curuppumullagē Jinarājadāsa,1915

The Theory of Archetypes James S. Larson,2004 The central thesis of the book is that man s perception of mind body and spirit has influenced his thinking in the social sciences Mind body and spirit serve as archetypes for social thinking and social institutions The book applies these concepts to major theories in the social sciences and also suggests ways to improve social institutions and practices by understanding the relationships between mind body and spirit

The Perfectibility of Human Nature in Eastern and Western Thought Harold Coward,2012-02-01 How perfectible is human nature as understood in Eastern and Western philosophy psychology and religion Harold Coward examines some of the very different answers to this question He poses that in Western thought including philosophy psychology Judaism Christianity and Islam human nature is often understood as finite flawed and not perfectible in religion requiring God s grace and the afterlife to reach the goal By contrast Eastern thought arising in India frequently sees human nature to be perfectible and presumes that we will be reborn until we realize the goal the various yoga psychologies philosophies and religions of Hinduism and Buddhism being the paths by which one may perfect oneself and realize release from rebirth Coward uses the striking differences in the assessment of how perfectible human nature is as the comparative focus for this book
