Architects In Cyberspace:

Architects in Cyberspace Maggie Toy,1995 Architects in Cyberspace Martin Pearce,Neil Spiller,1996-12-16
Examines Cyberspace as a whole new world for architectural investigation and design Further Architects in Cyberspace II Neil Spiller,1999-02-02 Another cutting edge issue of Architectural Design featuring top cyberspace architects Picking up where Architects in Cyberspace left off this companion issue of Architectural Design tracks the progress of previously featured architects along with new players in the field With exciting developments and projects under way all the time this part two installment offers a vital up to date report from the cyberfrontier of modern architecture complete with a review of the 1997 Paris Cyberspace exhibition dozens of color illustrations and more **Further Architects in Cyberspace II** Neil Spiller,1998 Following on from Architects in Cyberspace published in 1995 this issue of Architectural Design charts the progress of top cyberspace architects and new players in the field It contains a review of the 1997 Paris Cyberspace exhibition **AD** ,1995 **Cyberspace** ,2001 The term cyberspace was first penned in 1984 by William Gibson in his science fiction novel Neuromancer However the architectural possibilities of this area of design were being investigated well before the term was popularised and with good reason Envisioning Cyberspace Peter Anders,1999 Here is the first integrated approach to the design of virtual environments Through examples of the pioneering work of designers from all over the world this innovative guide shows architects designers and programmers how to create the landmarks and context of cyberspace and possibilities in this field for the future 105 illustrations 30 in color **Information Spaces** Robert M. Colomb,2012-12-06 Information Spaces The Architecture of Cyberspace is aimed at students taking information management as a minor in their course as well as those who manage document collections but who are not professional librarians The first part of this book looks at how users find documents and the problems they have the second part discusses how to manage the information space using various tools such as classification and controlled vocabularies It also explores the general issues of publishing including legal considerations as well the main issues of creating and managing archives Supported by exercises and discussion questions at the end of each chapter the book includes some sample assignments suitable for use with students of this subject A glossary is also provided to help readers understand the specialised vocabulary and the key concepts in the design and assessment of information spaces *Cyberspace, as a Generator Concept for the Future* Gözde Kan,İzmir Institute of Technology. Architecture,1999 Within the scope of this study while questioning the impacts of digital technology on the individual and architecture the thesis contains theories and projections relating to the new and future possibilities of the architectural design process in the information age as explored through the digital medium as well as the transfer of the digital ideas into reality The aim is to widen the understanding of the new possibilities for architecture The concepts metaphors possibilities techniques and expressions available to the designers of the virtual world are discussed and exemplified The new applications and opportunities that the digital world has to offer cyber architects of the future are

explored The thesis aimed to form a discussion on investigating the role of computer on design and what the idea of virtuality offer to architecture related with the projects In this regard the idea which is aimed to achieve is in all these transformations architecture too lives challenges inside and tries to find a new way in expressing the ideas together with cooperating the other disciplines Today in every field of our life we have been liberalized or more truly virtualized A general movement of virtualization has begun to affect not only the fields of information and communication but also our physical presence so as architecture As a result thesis tries to answer the questions of what is the break through Is the break through only in technology not in architecture or is the computer more than a representational tool including a series of comparative analysis

Drawing Architecture ,2013-10-18 We are in the second decade of the 21st century and as with most things the distinction between digital and analogue has become tired and inappropriate This is also true in the world of architectural drawing which paradoxically is enjoying a renaissance supported by the graphic dexterity of the computer This new fecundity has produced a contemporary glut of stunning architectural drawings and representations that could rival the most recent outpouring of architectural vision in the 1960s 1970s and 1980s Indeed there is much to learn by comparing the then and the now The contemporary drawing is often about its ability to describe the change fluctuations and mutability of architecture in relation to the virtual real 21st century continuum of architectural space Times have changed and the status of the architectural drawing must change with them This reassessment is well overdue and this edition of AD will be the catalyst for such re examination Features the work of Pascal Bronner Bryan Cantley Peter Cook Perry Kulper CJ Lim Tom Noonan Dan Slavinsky Neil Spiller Peter Wilson Nancy Wolf Lebbeus Woods and Mas Yendo Contributors include Nic Clear Mark Garcia Simon Herron and Mark Morris

The Architecture of Information Martyn Dade-Robertson,2011-06-02 This book looks at relationships between the organization of physical objects in space and the organization of ideas Historical philosophical psychological and architectural knowledge are united to develop an understanding of the relationship between information and its representation Despite its potential to break the mould digital information has relied on metaphors from a pre digital era In particular architectural ideas have pervaded discussions of digital information from the urbanization of cyberspace in science fiction through to the adoption of spatial visualizations in the design of graphical user interfaces This book tackles the historical importance of physical places to the organization and expression of knowledge the limitations of using the physical organization of objects as the basis for systems of categorization and taxonomy the emergence of digital technologies and the twentieth century new conceptual understandings of knowledge and its organization the concept of disconnecting storage of information objects from their presentation and retrieval ideas surrounding semantic space the realities of the types of user interface which now dominate

modern computing **Hypersurface Architecture** Stephen Perrella,1998-09-15 Essays and works by the leaders in the field of computer generated architectural design This book explores the advances in architecture made possible by digital technology The integration of cyberspace and the built environment is producing an entirely new method of designing The works of key architects including Bernard Tschumi Philip Johnson and Togo Ito are featured to illustrate this new method Includes essays by Peter Eisenman Andrew Benjamin Peter Lunenfeld and Marcus Novah Stephen Perrella New York NY lectures at the Graduate School of Architecture Planning and Preservation at Columbia University He is also the editor of the architectural newsletter Newsline and the president of Hypersurface Systems Inc a World Wide Web design company

Arquitectura y virtualidad Josep Muntanola Thonberg,2010-12-15 Es bien sabido que la arquitectura es un tipo muy específico de arte de ciencia o de acto ético porque los edificios las ciudades y los territorios son artefactos físicos y sociales no representaciones virtuales como sucede en el cine en la literatura etc Mijail Bajtin era consciente de esta especificidad cuando afirmaba que la arquitectura toda la arquitectura solamente tiene sujetos estéticos potenciales no héroes estéticos reales 1 Sin embargo estas cualidades específicas de la arquitectura no significan que el proyecto arquitectónico virtual es decir un proyecto aun no construido aun no usado sea real See more at <http://ebooks.upc.edu/product/arquitectura-y-virtualidad-architecture-virtuality> sthash qKiK1LUK dpuf **Making the Digital City** Alessandro Aurigi,2016-12-05 Since the late 1990s Information and Communication Technologies ICTs have been hailed as a potentially revolutionary feature of the planning and management of Western cities Economic regeneration and place promotion strategies have exploited these new technologies city management has experimented with electronically distributed services and participation in public life and democratic decision making processes can be made more flexible by the use of ICTs All of these technological initiatives have often been presented and accessed via an urban front end information site known as digital city or city network Illustrated by a range of European case studies this volume examines the social political and management issues and potential problems in the establishment of an electronic layer of information and services in cities The book provides a better understanding of the direction European cities are going towards in the implementation of ICTs in the urban arena Cyber Reader Neil Spiller,2002-03-19 Cyber Reader is an anthology of extracts from key texts relating to the theme of cyberspace the virtual communicative space created by digital technologies Approaching the subject from a variety of angles including science fiction this book reflects the multidisciplinary basis of cyberspace and illustrates how different disciplines can inform one another Over 40 texts are presented in chronological order beginning with key precursors to cyberspace theory as we know it today Writings by early theoreticians such as Charles Babbage and Alan Turing and authors such as E M Forster help to give a historical perspective to the subject while texts on theoretical developments show the parallels between real and imagined worlds Each extract is prefaced by a short introduction by editor Neil Spiller explaining crucial themes and terms and providing cross references to related texts An extensive bibliography enables the reader to pursue particular strands of

study that strike their interest Cyber Reader is an essential source book introducing students and researchers to cyberspatial theory and practice It will help the reader understand the wealth of opportunities both practical and theoretical that cyberspace engenders and enable them to chart its impact on many disciplines Building Civic Architecture in Cyberspace Catherine Howe,2014 **Crown - an Architecture for Cyberspace** Yosi Mass,1993 The Virtual Dimension John Beckmann,1998 The Virtual Dimension critically examines the role that digital and immersive technologies have on the methods used by architects designers and artists to conceptualize and represent both real and virtual spaces Interdisciplinary in nature the essays included here address the implications of going virtual from a variety of cultural and theoretical viewpoints BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Current Contents ,1999 **Ephemeral/portable Architecture** Robert Kronenburg,1998
