David T. Fortin,2016-12-05 The home is one of our most enduring human paradoxes and is brought to light tellingly in science fiction SF writing and film However while similarities and crossovers between architecture and SF have proliferated throughout the past century the home is often overshadowed by the spectacle of otherness The study of the familiar home within the alien SF creates a unique cultural lens through which to reflect on our current architectural condition SF has always been linked with alienation however the conditions of such alienation and hence notions of home have evidently changed There is often a perceived comprehension of the familiar that atrophies the inquisitive and interpretive processes commonly activated when confronting the unfamiliar Thus by utilizing the estranging qualities of SF to look at a concept inherently linked to its perceived opposite the home a unique critical analysis with particular relevance for contemporary architecture is made possible **The Oxford Dictionary of Architecture** James Stevens Curl,Susan Wilson,2015 With over 6 000 entries this is the most authoritative dictionary of architectural history available *Decoding Luigi Moretti's Architettura Parametrica* Giuseppe Canestrino,2025-05-16 *Decoding Luigi Moretti's Architettura Parametrica* presents an unprecedented critical discussion of one of the earliest theoretical and practical explorations into the integration of scientific thought mathematical models and digital tools in architectural design Moretti a renowned professional who engaged in countless intellectual initiatives developed and refined his architectural vision long before parametric became synonymous with computational design His *Architettura Parametrica* is an unconventional inquiry of the prospects offered to design practice by digital thinking rather than by digital tools which were still immature or completely absent at the time Moretti proposed a unique and still relevant mental landscape that united his fascination with Baroque spatiality operational research informal art optics cybernetics ethics and much more This research decodes numerous facets of *Architettura Parametrica* from the rigid theoretical precepts to the negotiation with design praxis from the use of equations to aid the research of forms to the speculation on the meaning of architecture through abstract mathematics This book offers novel perspectives to scholars interested in the interplay between architectural design practice and theory mathematics and design methods digital and architectural culture and to the growing number of practitioners who are crafting personal narratives within the most disruptive computational techniques **2050** Chris Luebke,2015-08-28 *Envisioning a positive future through design 2050* *Designing Our Tomorrow* describes the ways in which architecture and design can engage with the key drivers of change and provide affirmative aspirations for a not so distant future With a focal date of 2050 this issue of AD asks when and how the design community can should and must be taking action The discussion centres on shifts in the urban environment and an established way of life in a world of depleted natural resources and climate change Featuring interviews

with Paola Antonelli of MoMA and Tim Brown of IDEO it includes contributions from thought leaders such as Janine Benyus Thomas Fisher Daniel Kraft Alex McDowell Franz Oswald and Mark Watts High profile designers like FutureCitiesLab SHoP and UrbanThinkTank are featured as examples of forward thinking and innovation in the field highlighting the need for and possibility of a shift in the global perspective The discussion includes the challenges we face in creating a positive tomorrow and the solutions that architecture and design can bring to the table Despite the proliferation of global crises possibly threatening human survival our current moment provides the opportunity to write a new positive story about our future 2050 Designing Our Tomorrow describes how the design community can contribute to that vision by asserting positive aspirations for the worlds we create ourselves See how architects and designers inspire global positive change Consider architecture s role in shaping cultural outlook Learn the key drivers of change for the built environment Explore the perspectives of leading experts and designers Architects and planners over the centuries have put a stamp upon the planet through the physical manifestations of their belief structures Today s design community faces a rising wealth gap climate change shifting paradigms of nationalism and myriad other challenges 2050 Designing Our Tomorrow phrases global issues as a design problem and describes how architects and designers can rise to the challenge of creating a more positive future World Architecture ,2000 *Art Criticism* ,1988 *Place Above* Peter Sung Taek Kim,1998 □□□□□□□□ ,1975 The Metropolis, Its People, Politics, and Economic Life John Constantinus Bollens, Henry J.
