Arguers Position A Pragmatic Study Of:

Arguer's Position Douglas N. Walton,1985-02-19 Douglas N Walton considers the question of whether the conventions of informal conversation can be articulated more precisely than they are at present Specifically he addresses the problem of the fallacy of ad hominem argumentation as it occurs in natural settings Can rules be formulated to determine if criticisms of apparent hypocrisy in an argument are defensible or refutable Walton suggests that they can and ultimately defends the thesis that ad hominem reasoning is not fallacious per se He carries his analysis to the core of action theoretic reasoning by examining a number of specimen arguments As suggested by the title the conclusion of ad hominem argument is demonstrated to be relative to the arguer s position In the appendixes of the book articles by Gerald McAuliffe and Gordon R Lowe illustrate vivid and powerful cases in which Walton s contentions are put to the test

Problems in Argument

Analysis and Evaluation Trudy Govier,2019-11-05 No detailed description available for Problems in Argument Analysis and Evaluation

Fundamentals of Argumentation Theory Frans H. van Eemeren,Rob Grootendorst,Ralph H. Johnson,Christian Plantin,Charles A. Willard,2013-11-05 Argumentation theory is a distinctly multidisciplinary field of inquiry It draws its data assumptions and methods from disciplines as disparate as formal logic and discourse analysis linguistics and forensic science philosophy and psychology political science and education sociology and law and rhetoric and artificial intelligence This presents the growing group of interested scholars and students with a problem of access since it is even for those active in the field not common to have acquired a familiarity with relevant aspects of each discipline that enters into this multidisciplinary matrix This book offers its readers a unique comprehensive survey of the various theoretical contributions which have been made to the study of argumentation It discusses the historical works that provide the background to the field and all major approaches and trends in contemporary research Argument has been the subject of systematic inquiry for twenty five hundred years It has been graced with theories such as formal logic or the legal theory of evidence that have acquired a more or less settled provenance with regard to specific issues But there has been nothing to date that qualifies as a unified general theory of argumentation in all its richness and complexity This being so the argumentation theorist must have access to materials and methods that lie beyond his or her home subject It is precisely on this account that this volume is offered to all the constituent research communities and their students Apart from the historical sections each chapter provides an economical introduction to the problems and methods that characterize a given part of the contemporary research program Because the chapters are self contained they can be consulted in the order of a reader s interests or research requirements But there is value in reading the work in its entirety Jointly authored by the very people whose research has done much to define the current state of argumentation theory and to point the way toward more general and unified future treatments this book is an impressively authoritative contribution to the field

The Discourses of Science
Marcello Pera,1994-12-15 Rather science is a three way interaction among nature the investigator and a questioning

community which through the process of attack defense and dispute determines what science is Rhetoric then understood as the practice of scientific argumentation is an essential element in the constitution of science

Strategic Maneuvering in Argumentative Discourse Frans H. van Eemeren,2010-05-19 In Strategic Maneuvering in Argumentative Discourse Frans H van Eemeren brings together the dialectical and the rhetorical dimensions of argumentation by introducing the concept of strategic maneuvering Strategic maneuvering refers to the arguer s continual efforts to reconcile aiming for effectiveness with being reasonable It takes place in all stages of argumentative discourse and manifests itself simultaneously in the choices that are made from the topical potential available at a particular stage in adaptation to audience demand and in the use of specific presentational devices Strategic maneuvering derails when in the specific context in which the discourse takes place a rule for critical discussion has been violated so that a fallacy has been committed Van Eemeren makes clear that extending the pragma dialectical approach to argumentation by taking account of strategic maneuvering leads to a richer and more precise method for analyzing and evaluating argumentative discourse

Historical Foundations of Informal Logic Douglas Walton,Alan Brinton,2016-12-05 In just the last twenty years there has arisen a strong interest especially among teachers of logic at the universities in teaching techniques of applied logical reasoning and critical thinking Many universities are now stressing these skills at an introductory level and to meet the need informal logic has begun to form and grow as a discipline in its own right Like all subjects it helps us to understand it if we can situate it in a context of historical development This collection of essays provides the readings required to understand the development of a subject whose historical origins have been so far little studied Many of the chapters are written by scholars in philosophy and speech communication who are themselves leading contributors to the subject and their contemporary views throw light on how these earlier writers have influenced their thinking This dimension gives an added interest to the essays and indicates the way informal logic is currently evolving and seeking out its ancient historical origins

Fallacies and Judgments of Reasonableness Frans H. van Eemeren,Bart Garssen,Bert Meuffels,2009-08-05 In Fallacies and Judgments of Reasonableness Frans H van Eemeren Bart Garssen and Bert Meuffels report on their systematic empirical research of the conventional validity of the pragma dialectical discussion rules The experimental studies they carried out during more than ten years start from the pragma dialectical theory of argumentation developed at the University of Amsterdam their home university In these studies they test methodically the intersubjective acceptability of the rules for critical discussion proposed in this theory by confronting ordinary arguers who have not received any special education in argumentation and fallacies with discussion fragments containing both fallacious and non fallacious argumentative moves The research covers a wide range of informal fallacies In this way the authors create a basis for comparing the theoretical reasonableness conception of pragma dialectics with the norms for judging argumentative moves prevailing in argumentative practice Fallacies and Judgments of Reasonableness provides a unique insight into the relationship between theoretical and practical conceptions of

reasonableness supported by extensive empirical material gained by means of sophisticated experimental research *The Rise of Informal Logic* Ralph H. Johnson, 2014-07-15 We are pleased to release this digital edition of Ralph Johnson's *The Rise of Informal Logic* as Volume 2 in the series Windsor Studies in Argumentation This edition is a reprint of the previous Vale Press edition with some minor corrections We have decided to make this the second volume in the series because it is such a compelling account of the formation of informal logic as a discipline written by one of the founders of the field The book includes essential chapters on the history and development of informal logic Other chapters are key reflections on the theoretical issues raised by the attempt to understand informal argument Many of the papers were previously published in important journals A number of them were co-authored with J Anthony Blair Three of them have appeared only in the present book

A Practical Study of Argument Trudy Govier, 1991 A classic in the field A PRACTICAL STUDY OF THE ARGUMENT is widely recognized for its solid treatment of such basic topics as the nature of argument argument structure premise acceptability propositional logic categorical logic analogy and fallacies Integrated and carefully organized the Third Edition continues to give students a practical understanding of different types of arguments by concentrating on good arguments as they occur in natural language *Canadian Philosophical Reviews*, 1985

The Philosophy of Argument Trudy Govier, 1999 *Poznan Studies in the Philosophy of the Sciences and Humanities*, 1993 Douglas Walton, *Informal Logic, and the Uses of the New Dialectic for the Rhetoric of Inquiry* David Edward Beard, 2002 *Michigan Law Review*, 1989-05

Philosophy Books, 1982-1986 Thomas May, 1991 **From Science to Subjectivity** Walter Soffer, 1987-08-26 The past two decades have witnessed a flourishing of studies on Descartes by English language commentators The focus of attention has been the *Meditations* which continues to be regarded as the Archimedian point of Cartesian philosophy The schism that has characterized the history of Cartesian scholarship persists throughout this most recent revival of interest in Descartes The fundamental issue continues to be the question concerning the sincerity or insincerity of Descartes theological metaphysics

Coercion and Autonomy Alan S. Rosenbaum, 1986-10-08 Few subjects in contemporary philosophical and political debate are more cloaked in ambiguity than the issue of coercion whether on an individual or global scale or in areas as diverse as family relations employment and international finance In this first full length treatment of the topic Professor Rosenbaum carefully reviews previous thinking on this question and develops a persuasive original theory focusing on the conceptual relationship between human social autonomy and coercion

International Philosophical Quarterly, 1985 **The Dynamics of Knowledge** David Rich, 1988-08-24 As scientific discoveries and technological advances continue to modify our perceptions of reality at an unprecedented rate the traditional frameworks for understanding and organizing our experience of truth and Knowledge have become less and less adequate David Rich comes to grips with this problem in his innovative study which shows how both knowledge and truth are conditioned by experience and explores the dynamics of creativity that generate knowledge Rationality in Thought and

Action Martin Tamny, K D Irani, 1986-05-19 This collection of original essays examines the controversy over and attacks on rationality in the methodologies of the humanities and the physical and social sciences. These essays represent the thinking of a wide variety of philosophers, psychologists, historians, classicists, and economists about the role of rationality in thought and action. Reflecting the differing perspectives of their authors, disciplines, as well as the centrality of rationality to those disciplines, they are important additions to a debate that has been going on for some twenty years. Beginning with an introductory essay in which K D Irani covers the various ways in which rationality can be approached, the body of the book is divided into five sections dealing with various aspects of the issue. Respectively, they are concerned with rationality as it relates to ethical and social thought and action, general scientific thought, and the particular disciplines of economics, history, and law; the analytic and hermeneutic approaches to communications and learning; and the contrasting classical traditions of ancient Greece and China. In the final section, two differing theories concerning the nature of rationality itself are presented. A list of suggested further readings completes the volume.
